Excavation Manager

Mr Rooter plumbing - Fort Collins, CO
2001 to 2005

I was the manger of an excavating crew that specialized in trench less sewer repair. my duties included scheduling subcontractors, coordinating material delivery, pulling permits and scheduling inspections making sure materials were available at all while trying also to keep costs down, was responsible for maintenance of equipment, and insuring that my crew was safe. Would also run the backhoe on a regular basis and always supervise the installation of pipe burst and or lining

- Helped take a small excavating department that was doing 2-3 jobs per month to one that doing 3-4 a week set into motion a system of contractors permitting processes for doing very complex work that had to be done right the first time
- Instituted a best practices procedure for installing product also developed working relationships with inspectors and permitting agencies in 25 different communities along the front range
- With this job I needed to become well versed in international plumbing, streets and utility code also any regulations specific to the community
