Work Experience

Slurry Specialist

Chromatic Technologies Inc - Colorado Springs, CO
September 2021 to Present

JOB SUMMARY:

The slurry operator is responsible for the accurate execution of slurry manufacturing processes. This individual will follow Standard Operating Procedures to ensure slurries are produced to performance expectation and that the appropriate documentation is completed and submitted correctly and efficiently.

GENERAL STATEMENT OF DUTIES:

Weigh, blend, check, and deliver in a productive, efficient, and safe manner slurries to meet the demands of the ink production floor schedule.

Follow appropriate quality control and inspection process for slurries to ensure quality to customers.

Assist with maintaining the work off slurry process by regulating use and storage, this includes cycle counts of the slurry on the slurry finished goods racks.

Make sure that the equipment and floors are cleaned and properly maintained up to the standards the supervisor has put into place.

Machine Operator

MGP Connecting Rods - Colorado Springs, CO
March 2019 to July 2020

Assist in the maintenance, and repair of machinery while attaining manufacturing production goals.

- Operate machinery in order to aid in the manufacturing process.
- Create process improvements to streamline the manufacturing process.
- Perform periodic checks on equipment and solve problems and product defects as detected.

Data Entry Operator

Zoe Family Care Clinic - Lynn Haven, FL
May 2008 to May 2020

Responsible for performing data entry work using a personal computer and appropriate software; entering, updating, researching, verifying and/or retrieving data into/from various systems; and ensuring the accuracy and confidentiality of information recorded.

Senior Lead Machine Operator

DePuy Synthes - Monument, CO

June 2016 to March 2019

Perform machine setups and operate manufacturing equipment including but not limited to cutting, drilling, milling, bending, deburring, chemical finishing, laser etching and assembly in multiple cells and/or work areas

- Run process tests or rework operations and associated inspection and process control measures.
- Support other areas as training requirements permit to cover absences and other business needs.
- Generate daily metric requirements based on weekly production forecast, create work orders and issue raw material for multiple production cells.
