

NATHAN WALKER, CHST

Has over 20 years of experience working in the safety environment on multiple construction projects, including bio-pharmaceutical, military/federal, airfield, civil, T&D, oil & gas (upstream and downstream), environmental remediation, commercial and residential.

BNBuilders

Frederick, CO | 1/22 - Current

Safety Manager. Client is Agilent Technologies. This bio-pharmaceutical project consisted of new construction in an existing facility. An entire new Train was built enabling the client to double production with no new structures needed. The \$185 million project is slated to reach full

completion by the end of 2022. Key accomplishments during my time here included; revitalizing a safety culture and morale in difficult conditions, management of hot work processes in intrinsically restricted areas, coordination of client permitting processes, incident reporting both internal and to the client, management of eight safety professionals over two shifts, successful defense of false safety reporting to OSHA, management/coordination of varying COVID protocols as well as other basic safety professional duties.

Burns & McDonnell

Kansas City, MO | 03/18 - 11/21

Senior Safety Manager Provided safety oversight for projects throughout the United States. Locations included Hawaii, California, Massachusetts, Rhode Island, Michigan, Indiana, Missouri and Oregon. Scopes of work were varied within the different regions and operating groups, but included Federal, Aviation, Oil & Gas, T&D and several power plants. Successful teamwork and communication were key to the successful projects experienced while with this company. Clients included; Footprint Power, Army Corp of Engineers, UMERG, Toray, Lawrence Livermore Nuclear Laboratory, STL Fuels, WEC Energy, OVEC & BPA.

Murphy Company / Qualsafe Solutions

Frederick & Boulder, CO | 09/16 – 2/18

Safety Manager.

Agilent – Ground up construction of the “Agilent Apothecary” facility in Frederick, CO. Coordinated all safety programs for the mechanical contractor Murphy. Participated in coordinated walks and planning sessions with the GC and client. Monitored site conditions for all trades as a member of the site safety team and reported up to GC when needed.

AstraZeneca - Provided site safety coordination and management of over 150 union pipefitters, plumbers and sheet metal workers on a bio-pharmaceutical retrofit. Project was led by Fluor and had a very aggressive schedule. Project completed with no lost time injuries.

San Juan Construction

Montrose, CO | 3/14 - 6/16

Corporate Site Safety & Health Officer. Responsible for developing, maintaining and managing company-wide health and safety requirements, policies and procedures both in the United States as well as remote overseas locations. Provided corporate oversight and direct support to \$200M+ in projects for DoD installations.
