I find myself to enjoy challenges and consider myself a fast “hands on” learner. I also consider my work ethic top notch and have always took pride in my work regardless how big or small the task.

Authorized to work in the US for any employer

Work Experience

Crane Operator/Forklift Operator

Molin Concrete Products - Lino Lakes, MN

July 2014 to Present

I have worked at Molin for going on 5 years. While employed at Molin I've held multiple positions. I started working in the precast manufacturing department for 2 1/2 or so years and then moved to the quality control department. While in quality control I became ACI certified concrete tester followed by becoming certified PCI levels 1 and 2. After about a year and a half in QC I realized the pace wasn't for me and was taken back into the manufacturing side of the company where I soon became a lead man in the beam manufacturing area. Although short lived as a lead man I respectfully resigned from the position because of different philosophy's with upper management. I now hold a crane operator position in our yard where I load trucks with our products.

Laborer

Education

High school or equivalent

Centennial High School - Circle Pines, MN

September 2006 to June 2009

High school or equivalent

Certifications/Licenses

ACI

March 2017 to March 2022

ACI certified concrete tester

PCI level 1&2

September 2017 to September 2022

PCI is a precast concrete and cable tensioning certification which allows me to test many different aspects of concrete and also calculate elongation for stressed cable and perform the stressing of said cable.
