Working with people either co workers, guests or people reaching out to the company, is a strong suit of mine. The ability to learn the in's and out's of a job, and all of its aspects, seem to come natural with me. I am guaranteed to do the job right, and raise the bar beyond what is considered the norm.

Authorized to work in the US for any employer

Work Experience

Shift Leader

Dollar General - Concord, NC

December 2023 to March 2024

I was asked to become assistant manager on my first day! This job really allowed me to show off and enhance my skills, knowledge, and management opportunities. I became a shift lead quickly, my manager noticed my presence when it came to customers, stocking, and cash handling for the bank. We began getting more customers, and as I was leaving, quite a few of my common guests actually mentioned I had the best customer service, and it would be a shame to see me leave. Overall, the job was amazing, and I had to leave to relocate to Colorado.

Dog Caretaker

Happy Tails Pet Salon - Loveland, CO

March 2023 to July 2023

Taking care of dogs and cats was my job, and it was quite the experience. From cleaning out dirty kennels, to giving medicine to sick animals. It was loving and fun, and the animal parents always had great conversations and good information about their pet as well. The best part however, was playing with them, as well as taking them on special enrichment activities. Overall the job gave me good techniques on animal care, as well as help me with my customer service skills.

Canvasser

Landslide Political - Fort Collins, CO

June 2022 to July 2023

I would go around petitioning for new amendments to be put on the ballot of the next mid term elections. I would speak to people and inform them on the potential of a new amendment to be added, or new laws that could help the local state and community.

Education

None in High school diploma

Mountain View High School - Loveland, CO

- Computer literacy

Additional Information

I believe I'm a versatile worker, I can do anything from hard manual labor, to sales. I can communicate with my team and customers as words are the way to success. My sales side, I'll ask questions to the client that addresses both of our needs. I can show them we are the best option compared to other companies, as well as give them additional options they may need for their experience. Manual labor isn't something I'm new with. I can lift, push and stand for many hours on end. Something I particularly enjoy in a work environment is new situations. The work environment can stay the same, but I want to make sure every day is new and different. I also do plan on getting into the business end of companies, as well as getting tech certifications as well.
