EXPERIENCE

Eaton Innovative Switchgear, Broomfield — Assembler 3

Jan 2023 - PRESENT

Works alongside a small team to fulfill custom orders from clients for complex and often long term builds taking up to a week to complete combining both physical manufacturing with power tools with electrical wiring, crimping, and assembly according to wiring schematics

Currently the sole test technician responsible for administering low-volt and hipot tests alongside visual inspections to ensure quality in every unit before it is sent to the customer

Often performs physical tasks requiring bending or lifting 50+ lbs

Experienced in safely maneuvering within a warehouse environment and production floor

Hach, Loveland — Operator 1

May 2018 - July 2022

Autonomous worker, expected to prioritise various custom orders alongside a daily production schedule

Daily tasks included wiring, soldering, crimping, assembling, and testing various electrical assemblies either for in house builds or in field repairs.

Often was required to build to a high quality standard for medical equipment.

Worked alongside quality engineers to reinvent work instructions and processes

Helped implement 5S practices for multiple manufacturing areas

GCA services — Custodian

Oct 2017 - May 2018

Experience working with and adapting to limited communication

Safely worked with many hazardous industrial cleaning chemicals

United Electronics Group - Technician 1

2016 - 2017

Worked with a team for quality assurance on refurbished electronics

Used both software and physical tests to identify and troubleshoot problems in electronic devices before approving to be sent to a customer or rejected for further

repair.
