

Raji Ramasamy

QA Tester

Plymouth, MN 55446

rraji@comcast.net

651-242-8574

I have 4+ years of professional Software Quality Assurance experience.

Hands on experience in manual testing of suite of ASP.Net based web applications.

- Professional experience in storing the test plans and results on Team Foundation Server (TFS) using Microsoft Test Manager (MTM).
- Highly skilled in performing multiple simultaneous job responsibilities including webmaster, reports development and application technical support.
- Received formal training and certification in automated testing tools like QTP.

My current location is Minneapolis, MN and I am an U.S Citizen.

Authorized to work in the US for any employer

Work Experience

QA Tester

ThermTech - Throughput Consulting Inc - Waukesha, WI

April 2014 to June 2018

ThermTech - Throughput Consulting Inc., (<http://www.go-throughput.com>)04/2014 - 06/2018

QA Tester - Waukesha WI

Throughput is a leader in the software for the Metal Heat treating and Powder Coating industries. In addition to the regular job responsibilities at TCI, acted as the dedicated QA consultant for our partner ThermTech to force the success of Bluestreak implementation.

- Created manual test cases for all the modules of the application using Microsoft Test Manager and revised them as needed.
- Executed the test cases and assigned the bugs to the development team with appropriate notes for the development team to replicate the issue.
- Acted as Quality Assurance Analyst to configure the Quality specification plans and reviewed the quality test results across various operational steps in all the Processes within Bluestreak.
- Reviewed the CAPAs, Concerns, Non-Conformances, equipment maintenance schedules etc. periodically to make sure the job floor is operating as expected and follows the ISO standards.
- Reviewed the internal audit system from Audit Portal to make sure all specifications are met.
- Attended daily scrum meetings and participated in the issues prioritization managed in TFS.
- Participated in the agile sprint planning meetings to prioritize the TFS work backlog items and plan the monthly release schedule from the testing standpoint and provide updates
- Developed simple SQL scripts for Grid based reports and modified stored procedures in SQL Server to accommodate the requirements of the customers for their reports.
- Developed and deployed custom reports either in the SaaS servers or self-hosted sites.
- Prepared release notes for every release that includes the bugs fixed in the specific release.

- Acted as Business Analyst to gather custom requirements and import data from their existing system into Bluestreak using a standard template format.
