Education

GED - 2017

Cornerstone Christian Schools - San Antonio, TX

Work History

Heavy Equipment Operator/ tech - November, 2022 to November, 2023

Primoris Energy Services Corporation/PSC - Deer Park, TX

- Received training in a variety of equipment and useful attachments so that I could handle any team need.
- Increased the protection of equipment and personnel by identifying and avoiding hazards such as utility lines.
- Graded and shaped land for construction and finishing.
- Communicated issues that needed to be addressed right away with the Foreman so that they could be resolved quickly.
- Followed all heavy equipment safety and operation protocols to the letter, which resulted in few complaints or incidents.
- Completed all equipment logs and reports accurately and thoroughly before and after each shift.
- Communicated with ground team members and fellow operators to avoid safety hazards and keep materials moving.
- Locked up tools and job site machinery and secured the area at the end of each shift.
- Determined and marked the locations of underground pipes and wires to plan optimal digging locations.
- as the need presented it's self- I would weld on any machine implement to create a "hard-face" a Series of welds in a pattern along the surface of a machine's attachment In order to preserve the life and structural integrity against abrasion and any potential damage. Also Repaired and replaced malfunctioning parts to keep machinery in good working order.

Equipment Technician - July, 2020 to November, 2022

American Construction & Engineering - Bartow, FL

- Oversaw the daily maintenance and machinery operations on the gypsum stacks for mosaic' fertilizer production by a team of heavy equipment operators , which resulted in the safe and efficient completion of production goals
- Kept track of equipment maintenance tasks, new installations, and repair procedures in a database.
- Created a detailed checklist for the shop management team. And assisted with any welding and repairs needed to get machinery back in service
- Evaluated and interpreted data from facility equipment.
- Used operational manuals, maintenance records, and forums to gain troubleshooting insight for complex issues.
- Welding machines, grinder, drills, precision measuring instruments, and electronic testing devices were among the hand and power tools I used.
- Learned a wide range of equipment, including hand and power tool mastery, and applied my knowledge on a daily basis to perform routine and advanced repairs.
- Assisted other technicians in the maintenance and repair of equipment.
- Maintained and repaired farm machinery, systems, and vehicles, such as tractors, harvesters, and irrigation systems to keep operations running smoothly and efficiently.
- Was in charge of installing, aligning, and balancing new gps grading equipment.
- Went to daily safety meetings to ensure the safety of machine operations.
- Technical manuals and blueprints were easy for me to understand and read.
- Examined machinery and tested electrical systems and wiring for flaws and issues that hampered performance.
- Collaborated with Mosaic representatives to determine their needs and to insure we were providing a safe and effective service.

Ranch Foreman - February, 2016 to January, 2020

Paris cattle company - Bowling Green, FL

- Learned all aspects of operations, including welding and fabrication ,repairing any damage to fence lines, gates and livestock sorting pins! Also training new colts and tending to the livestock.
- Provided immediate first aid to any wounded livestock and monitored wounds closely for the potential risk of infection.
- Ensured that the livestock were ready for market and auction deadlines.
- Was in charge of more than a dozen employees and provided mentorship and training to help them become more productive.
- Kept my general ranch knowledge and horsemanship up to date by attending clinics on such criteria and by putting in the time and effort to learn
- Collaborated closely with team members to meet project deadlines, develop solutions, and deliver project requirements.
- Developed a reputation for punctuality and hard work.
- Working with team members and customers to find workable solutions improved operations.
