- Demolition
- Construction machinery operation
- Experienced Oversize driver
- Familiar with OSHA rules and regs.

- Residential construction
- Blueprint reading
- Leadership
- Strong Mathematical skills
- Strong communication skills
- Friendly and hardworking

Maintenance Tech

May 2013 – Current

Brooks Tower – Denver, Colorado

Here I performed necessary PM'S on vital equipment for the building, work on resident's homes doing anything from plumbing to hanging a picture. Talking and communicating with residents, filling out paperwork accurately, help with billing.

Low boy driver / Operator / Laborer

August 2012 – May 2013

Big R Construction - Elizabeth, Colorado

I would drive equipt from the yard to location, or location to location, using directions, and knowledge of which roads I could travel with the clearance that I had. A lot of the loads were oversize, and overweight. I threw chains and chained down all my loads myself. I would also operate equipt when necessary, and jump in and help shovel as needed.

Frac Hand/ Winch truck operator

January 2010 – August 2012

Hallibuton Energy Services – Brighton Colorado

I started as a frac hand, ran our high pressure pumps with via computer, was responsible for strapping all chemicals, and tracking them throughout job. I then mover to QC and ran fluid samples to ensure quality. I then moved into a winch truck operator (CDL A) moving our sand bins from location to location, following directions. Many of our bins were oversize, and overweight.
