OBJECTIVE

Experienced Quality Control Specialist with a strong background in electronic and mechanical inspection. Skilled in using precision measurement tools and advanced testing methods to ensure product quality and reliability. Certified IPC Specialist IPC-A-600 and IPC-A-610, committed to maintaining high standards and continuous improvement. Seeking to contribute my expertise to a dynamic technology company.

WORK EXPERIENCE

Advanced Assembly
Quality Control

Aurora, CO
July 2022 - Present

- Inspect components on motherboards, including capacitors, resistors, leads, and more.
- Ensure components are defect-free and properly installed with the correct amount of solder paste.
- Conduct logograph and Time Domain Reflectometry (TDR) tests to ensure circuit board quality.
- Utilize a range of precision measurement and inspection tools, such as:
 - Calipers
 - Micrometers
 - Thread gauges
 - Magnifiers
 - Microscopes
 - Multimeters
- Employ optical comparators and advanced mechanical inspection tools and gauges for detailed analysis and quality control.

Certifications:

- On November 1st, 2021, I got my IPC Specialist IPC-A-600 Certified.
- On August 16th, 2022, I got my IPC Specialist IPC-A-610 Certified.

Advanced Circuits
Quality Inspector

Aurora, CO
November 2018 - July 2022

- Inspected PCB boards for defects and ensured no delamination.
- Verified that traces were not cut or scratched.
- Checked that dimensions met customer specifications.
- Utilized inspection tools such as:
 - Calipers
 - Loupes
- Packaged inspected boards based on customer requirements:
- Vacuum-sealed bags with air removed (or as per customer's preference).
- Placed completed boards on shelves for the shipping department to handle.

Elkay Manufacturing
Quality Assurance

Aurora, CO
October 2013 - September 2018

Role: Sander

- Used sanding machines, staplers, hammers, and screwdrivers
- Sanded wooden cabinets to smooth out imperfections before applying paint.

Promotion: Assembler

- Assembled cabinets using the same tools (sanding machines, staplers, hammers, screwdrivers).

Final Role: Quality Inspector

- Inspected finished cabinets to ensure they met quality standards.
- Made improvements to correct any issues.
- Added labels to indicate that cabinets were ready for packing.
