PROFESSIONAL OVERVIEW

Highly adaptable Supply Chain professional with comprehensive experience in procurement, production planning, and operations management. Adept at navigating complex challenges and implementing innovative solutions to optimize supply chain performance. Seeking a challenging role in a forward-thinking company where I can apply my skills and dedication to drive continuous improvement and customer success.

WORK EXPERIENCE

Seagate Technology (25 Years)

- **Staff Buyer (Procurement, 8 Years):**
 - Managed high-volume procurement of diverse commodities, including capital equipment, tooling, packaging, IT equipment, and manufacturing services.
 - Executed RFQs, negotiated cost savings, and implemented supplier performance management strategies.
 - Developed and managed contracts, including payment terms, non-disclosure agreements, and other critical terms and conditions.
- **Senior Production Planner (Production Planning and Control):**
 - Designed and implemented a planning bill of material concept, enabling the transition of a highly configurable product line to an automated MRP system, significantly improving efficiency.
 - Served as the primary liaison with product development core teams, coordinating daily needs and priorities for the production team.

Insight Technical Service (Purchasing Manager):

- Gained comprehensive experience across various Supply Chain functions, including sourcing, planning, procure-to-pay, and inventory management.

Tharp Custom Cabinetry:

- Applied expertise in sourcing, planning, procure-to-pay, and inventory management to optimize supply chain operations.
