

Cruz Fernando Toquinto Jr

Warehouse/Manufacturing/Assembly Line/Production

cruztoquinto136699@gmail.com • (303) 304-2131 • Longmont, Co USA, 80503

Employment History

Food production associate, Owens family foods

12/2025 – 06/2026

- Support food production Activities:
- Unload, inspect and receive inbound materials to the warehouse (use of pallet jack)
- Weighing and blending ingredients to recipe - ensuring accuracy, tracking LOT codes used and completing inventory of remaining ingredients. Load 50lb bags into the mixer while excluding any foreign material and following cleanliness standards.
- Support equipment operation, room to grow into the equipment operator role as training is completed, if aptitude exists
- Inspect and package finished product and palletize. Manage reworked units, properly disposition any damaged, high or low weight units to be reprocessed. Support the operator in identifying and correcting any issues causing units to be out of specification.
- Support cleaning between product cycles, safely clean and test food production equipment for cleanliness and ensure proper hygiene and food safety.
- Follow HACCP guidelines to ensure food safety throughout the production process.
- Maintain sanitation standards within the production area to prevent contamination.
- Conduct routine inspections of equipment and perform basic troubleshooting as needed.
- Collaborate with team members to meet production goals while maintaining high-quality standards.
- Utilize basic math skills for inventory tracking and measurement tasks.
- Safely operate forklifts for material handling when necessary.

Assembly Line Worker, Relucent Plastic Solutions / Relucent Medical Solutions

11/2024 – 12/2025

Erie, CO

- Produced molded composite parts to cleanroom standards, maintaining consistent cycle times and measurable quality outcomes.
- Installed and secured nut casings into molds to ensure reliable screw retention and reduce assembly rework.
- Applied precise company-identifying imprints on plastic parts with consistent alignment and legibility.
- Operated in a controlled cleanroom following contamination-control procedures to preserve product integrity.
- Trained new operators in precision handling and cleanroom protocols, reducing onboarding variability and improving accuracy.
- Standardized torque and fastening inspections at station entry to detect defects early and sustain assembly integrity.
- Redesigned component feed layout to reduce operator reach and accelerate cycle handoffs, producing measurable production gains.
- Refined inspection checkpoints to detect defects earlier, preserving downstream assembly quality and reducing rework.
- Monitored machine performance trends and adjusted setup parameters to prevent recurring faults and increase equipment uptime.

- Piloted tool-prep kits for rapid station resets, reducing operator search time and enabling smoother cycle handoffs.
- Coached team members on safety and handling procedures, building competence and lowering variability during peak production.
- Performed precise fixture adjustments and measurement verifications at changeover to ensure dimensional conformity and stable results.
- Introduced a modular station layout to enable faster part changeovers, improving line adaptability and supporting consistent throughput.
- Led shift huddles to align operators and maintenance on priority fixes, speeding resolution of stoppages and restoring steady output.

Stocking/warehouse, Family Dollar

01/2023 – 11/2024

Denver, CO

- Redesigned inbound staging layout to separate fragile and bulk items, reducing handling errors and enabling faster, safer transfers to sales floor.
- Coached teammates on equipment-safe stacking and inventory handling best practices, enhancing team consistency and lowering incident risk during busy periods.
- Introduced checklist-driven receiving inspections to catch discrepancies at arrival, improving downstream order accuracy and reducing corrective tasks.

Stocker, Dollar Tree

12/2021 – 01/2023

Longmont, CO

- Restocked store shelves quickly to maintain organized displays and improve product availability across aisles.
- Assisted customers in locating products and answered inquiries to raise customer satisfaction with timely support.
- Followed safety protocols and maintained store cleanliness to reduce incident risk and ensure compliance with store standards.
- Performed daily quality inspections of perishables and packaging to catch defects early and preserve product integrity for shoppers.
- Coordinated with cashiers and supervisors to prioritize restock for high-traffic zones, reducing out-of-stock incidents and smoothing checkout flow.
- Managed end-of-day zoning to optimize morning setup, reducing opening delays and enabling team members to complete priority tasks faster.

Packaging and Production Associate, Boulder Organic

12/2018 – 12/2020

CO

- Packaged finished food items and sealed containers to meet daily production targets while maintaining sanitation standards and steady throughput.
- Conducted routine quality checks and enforced food safety protocols, producing measurable improvements in product consistency and compliance.
- Collaborated on a fast-paced production line to optimize throughput and reduce processing delays, improving overall team efficiency.
- Streamlined changeover steps by standardizing tooling checks, shortening downtime between runs and supporting steadier order fulfillment.
- Analyzed production flow to identify non-obvious delays, redesigned task sequence, and achieved noticeable gains in shift consistency and throughput.

Stocking Associate, Harbor Freight

12/2017 – 12/2018

Longmont, CO

- Stocked and organized inventory in a high-volume warehouse, maintaining steady product availability and safe aisles.
- Assisted with loading and unloading shipments, improving receiving throughput and reducing handling delays.

- Maintained a clean, safe work environment, supporting consistent shift productivity and compliance.
- Adjusted receiving floor layout to improve flow, reducing congestion and enabling smoother handoffs.
- Directed priority restock cycles during peak hours to accelerate shelf replenishment and sustain product availability.
- Trained new associates on safe handling and efficient picking patterns to strengthen team reliability.
- Introduced a visual tagging method for high-turn items to speed identification and shorten restock time.
- Established targeted audit checkpoints to address recurring stock discrepancies and improve inventory traceability.
- Redesigned receiving-to-floor zone handoffs to reduce bottlenecks and produce measurable throughput gains.
- Coordinated with sales floor leads to prioritize high-demand SKUs, improving retrieval speed and availability.

Cashier, Wendy's

01/2017 – 12/2017
Longmont, CO

- Provided fast, friendly service to customers
- Operated cash register and handled transactions accurately
- Maintained cleanliness and organization in the work area
- Managed cash drawer operations with strict sequence controls and end-of-shift checklists, ensuring accurate reconciliation and clear handoff between shifts.
- Partnered with kitchen and drive-thru staff to adjust peak-period workflows, coordinating timing to speed order handoffs and enhance overall throughput.
- Maintained precise transaction records and flagged irregularities for manager review, supporting transparent audits and operational accountability.
- Trained new hires on register procedures and customer interaction techniques, building faster onboarding and consistent service standards during busy shifts.
