Professional Summary

Machine Tender/Operator. Seeking a position in a Manufacturing environment, where

I can maximize my 20 years' experience in the operation of various machines in the production of manufactured products, into an essential roll utilizing my supervisory, safety, and production experience.

Work Experience

Sr. Operator

CoorsTek | Golden, CO

April 2024 to Present

Utilize HMI touchscreen to control process equipment and systems and record quality control testing data, associating HMI graphics with physical equipment in the process area.

Follow work instructions, specifications, and special instructions in the preparation of AMP material, and report any deviation to lead or supervisor.

Read, understand, and follow on-screen prompts and batch errors.

Utilize data generated by process instrumentation to determine and implement required process interventions.

Work with maintenance and engineering to troubleshoot process and equipment issues.

Perform in-process testing for assigned process area, using both manual and automated systems.

Operate manual and automated bulk bag unloaders (BBU's).

Load and unload both wet and dry ball mills manually or with automated systems

Use forklift equipment to move around bulk bags of material, remove trash, to safely move pallets to the mezzanine.
