+1 918 340 8737

Professional Summary

Two consecutive years of supervising and managing more than 20 personnel in various logistical actions on various naval ships. Strong leadership, time management and team building skills. Extensive knowledge in naval navigation systems. Experienced with government regulations in firefighting and rescue procedures as well as compliance issues for hazardous waste incidents and emergency planning.

Willing to relocate: Anywhere

Authorized to work in the US for any employer

Work Experience

CNC Machine Operator/Programmer

Wedlake Encllosures-Tulsa, OK

April 2024 to Present

Assisted programming parts in accordance with material thickness and correct dimensions, forming and bending metal in accordance with updated blueprints, setting up machines and die tools to properly form metal, programming prints into cnc machines as a prompt for later use

Machine Operator

S&T Manufacturing-Tulsa, OK

August 2023 to April 2024

- Sets up and operates automated CNC Vertical & Horizontal Machines.
- Set up and operate Vertical 3 axis and Horizontal 4 & 5 axis machines.
- Ability to understand rotation of fixtures as applied to Horizontal Machine set up.
- Must be versed in Rotary or Indexing capability
- Optimize process to achieve maximum efficiency.
- Save updated programs.
- Check parts to ensure they meet blueprint specifications using proper gauges.
- Perform daily point checks on machine and report concerns to Shop Floor Supervisor
- Use proper feed and speed for maximum efficiency.
- Deburr as required for work in process.
- Meets departmental/company goals and objectives in a timely manner.
- Interpretation of drawings, sketches, and/or working to set up sheets and verbal instructions.
- Performing cutting, turning, drilling, boring, reaming, tapping, and finishing operations where tolerances range from 0.030 to 0.0003 inch. This includes setup of machine and fixtures for any of the various operations while working with such materials as steel, stainless steel, aluminum, brass, copper, and magnesium alloys
- Use of scales, calipers, internal and external micrometers, height gauges, surface gauge, and dividers to determine that the part is being machined to the proper configuration.
- Carbon arc gouging experience.
- Plasma table

- Roll machine
- Sheer cutter

Machine Operator

DIAKIN / GOODMAN, Texas Technology Park-Houston, TX

July 2022 to July 2023

- Produces parts from raw materials in bars or flat forms, casting and forging materials, ferrous and non-ferrous metals and plastics using various machine tools, assorted hand tools, measuring devices, and tool steels and carbides,
- Operates a variety of machine tools, working from blueprints, sketches, specifications and oral instructions to procure tools, jobs, and fixtures,
- Shapes and threads parts to meet manufacturing tolerances, and makes skillful use of all standard hand tools and measuring instruments to do so,
- Selects feeds and speeds for cutting operations on a wide variety of materials,
- Grinds or dresses own cutting tools, Makes necessary machine shop mathematical computations,
- Utilizes charts, tables, standard data sets, and equipment manuals for various machines,
- Works with and completes job order forms,
- Completes all proper and necessary steps to set up own machine,
- Self-inspects parts to ensure all specifications are met before sending parts to the next downstream process,
- Works from blueprints and instructions to perform shaping and threading of parts to manufacturing tolerances.

Merchandiser

The Coca-Cola Company-Tulsa, OK

January 2020 to June 2022

- Restock displays, sections, racks, coolers and shelves in an aligned manner
- Build displays and other promotional items throughout the assigned store
- Maintain backrooms by organizing and consolidating back stock in a safely accessible way
- Set aside and store in backroom any product unfit for sale
- Operate powered equipment (ex: powered pallet jack) and manual equipment
- Clean and organize shelves or aisles each day to provide a safe environment for consumers

Machine Operator

Koala Kare Products-Centennial, CO

January 2017 to November 2019

- Production experience preferred.
- Ability to read and/or interpret documents such as work orders, procedure manuals, operating and maintenance instructions, and safety rules.
- Ability to comprehend and respond appropriately in English is required: fluency in the English language preferred.
- Lift, push or pull loads up to 50 pounds.
- Use of light tools such as, screwdrivers, drills, hammer, rivet guns, air tools, various machines, etc., is required.
- Basic computer skills.
- Organized and detail oriented
- Positive attitude and great work ethic
- Self-motivated, strong desire to achieve personal professional growth

Inventory Control Supervisor

United States Navy

August 2014 to December 2016

Certified Navigation Electronics Technician

Education

Medical Assistant (High school or equivalent)

Concorde Career College

March 2017 to September 2017

High school diploma

Rangeview High School Aurora-Aurora, CO

May 2014

Upper secondary education

Skills

- AutoCAD
- Manufacturing company experience
- CATIA
- Order Selector
- M-code
- Assembly line
- Warehouse Associate
- Selector
- Negotiation
- CNC milling machine
- Project management
- Quality assurance
- Problem-solving
- Machine cleaning
- Milling machines
- Customer service
- Equipment setup (production tasks)
- Forklift
- Machine operation
- Renderings
- Merchandising
- Account management
- Windows

- SAP
- CNC machine operator experience
- Pallet Jack
- GPS
- Metal forming fabrication
- Blueprint reading
- Cash handling
- Technical support
- Administrative experience
- Programmable logic controllers
- Tooling design
- Conflict management
- Repair, Maintenance & Installation
- Mechanical knowledge
- CNC laser cutting
- Tooling
- Utilities
- Heavy lifting
- Lean manufacturing
- Manufacturing
- Production planning
- installation
- Load & unload
- CAD
- Proofreading
- Metal fabrication
- Machine operator experience
- Google Suite
- Teamwork
- AI
- 5S
- GD&T
- ASME codes & standards
- Tool & die
- Database management
- Assembly
- Power tools
- CNC
- Logistics
- Pressing

- Order Puller
- Mechanical troubleshooting
- Crane
- Trigonometry
- CNC lathe
- Press brake machine
- Manufacturing facility
- Precision measuring instruments
- Maintenance
- G-code
- Identifying materials in blueprints
- Micrometer
- Fabrication
- Quality audits
- Stainless steel
- Press operation
- B2B
- Attention to detail
- Blueprint specification interpretation
- Heavy equipment operation
- Appliance repair
- CAD detailing
- Cooking
- Math
- Quality control
- Shop math
- Numeracy
- Computer skills
- Basic math
- Unity
- Calipers
- Assistant Manager Experience
- Restaurant experience
- CNC programming
- Schematics
- Repair, Maintenance and Installation
- Janitorial experience
- Machine setup
- Measuring instruments
- Technical drawing

- Fanuc
- Microsoft Word
- Continuous improvement
- Blueprint symbol interpretation
- Military Experience
- Interpreting client documents (production tasks)
- Cutting machines
- Microsoft Outlook
- Coordinate measuring machine
- Lean
- Quality management
- HVAC
- Geometry
- Robot programming
- CAM programming
- Vertical mills
- EdgeCAM
- Materials handling
- Construction
- Order entry

Certifications and Licenses

Forklift Certification

Hazardous Waste Operations & Emergency Response Training

J Standard Certification

IPC-610 Certification
