Work Experience

Shipping and Receiving Clerk

BEGA North America-Broomfield, CO

March 2024 to Present

Use computer and paper systems to keep incoming material quality accurate and located in the correct locations. Use label printers to identify boxes qty and location. Load/Unload any incoming freight, outside process WOs stock all material according. Print pick and issue all wos, pick and stage in corresponding planner code.

High Reach Forklift Operator

Lineage Logistics-Henderson, CO

January 2021 to February 2024

As a high reach forklift operator I use the scan gun and corresponding computer to either scan inbound and put them away in the correct locations as well as scanning out bounds such as cherry picks fulls and partials. I finish off the order with a count for all product with matching product numbers and fully stack and wrap each pallet before loading trailers

Sign Builder

J&S Contractors-Denver, CO

January 2023 to December 2023

Use press machine to cut metal at desired lengths. Rivet and connect Z-Bars onto back of sign. Depending on blueprints and measurements, face the signs with desired color and style of design. Use basic hand tools power tools to finish product

Precast Laborer

Encon Colorado-Thornton, CO

August 2019 to January 2021

my daily job duties consist of building beams flat beams and other concrete structures from start to finish. First things first make all accurate measurements and cuts for our equipment to build. Then start pulling and stressing cables to help secure the rebar you form the walls and tops of these beams. Then properly tie tighten and accurately insert all electrical cutouts. The final steps consist of enclosing the rebar and wire mesh structure inside of multiple metal forms to then begin pouring the concrete.

Warehouse Worker

SPEC BUILDING MATERIALS-Commerce City, CO

October 2018 to September 2019

I was partnered up with a driver to deliver shingles and other roofing materials to houses and commercial projects. We had to tie down the truck make sure supplies were properly strapped down for safe transport. We used a conveyor belt to send each shingle on the roof as well as the other materials. We then stacked them accordingly in proper numbers and amounts of weight that the home would support. Then I floated between truck and warehouse in which I built orders and properly shrink wrapped them for safe transportation. I use cherry pickers as well as sit down forklifts and stand on pallet jacks to properly conduct job duties

Warehouse Worker

BUILDERS WAREHOUSE-Aurora, CO

May 2018 to October 2018

I was a truss assembler. I put pieces and cuts of wood on a table then stapled them together and played each connector point. Table leader then rolled the truss and sent it out to be inspected.
