Work Experience

Machine Operator

Circle Graphics

April 2021 to August 2022

Machine Operator

I was in charge of printing machines that printed bulletin boards. I would run 2 to 3 machines depending on the work load or people available.

My job untitled me checking the rolls for good print color and change rolls when needed. I also cleaned the printing machines changed out paint when needed changed out main rolls when needed. We were also in charge of adding more print or reprints to the system.

Assembly Soldering Testing

MKS Manufacturing

March 2019 to April 2021

I would assembly the 5G system

I would start from scratch down to the soldering assembling testing and final stage packaging I was in charge from beginning to end

Plastic Injection Molding

Plastic Molding Technologies

I was a machine operator I was in charge of the QC flash removal weight and packaging

Assembly

NEO Tech

I was assembling machines that would detect if gauze had been left inside a patient after surgery. I was responsible for the assembly of the entire machine from beginning to end. We assembled tested and shipped the machine.

Machine Operator Sander Assembly

Tecomet

My job was to make the MRI machines

I would start by puncturing a whole in the metal tube this I did with 2 small metal tubes one smaller than the other this was done on a machine. Second I would sand it down then came the assembly then we would wash them down test for length they had to be at a certain length to pass to the next step
