Experiencia laboral

Quality Control Technician

Lincoln Industries-Pine Island, MN

agosto 2021 - febrero 2026

- Inspect raw materials, in-process parts, and finished products to ensure they meet specifications.
- Read and interpret blueprints, technical drawings, and quality standards.
- Perform dimensional inspections using calipers, micrometers, gauges, and CMM (if applicable).
- Conduct visual and functional testing.
- Identify defects and document non-conforming materials.

Documentation & Reporting

- Record inspection results accurately in reports or quality systems.
- Maintain quality logs and production records.
- Prepare reports for supervisors and management.
- Assist with root cause analysis and corrective actions.

Team lead tube bender

Lincoln Industries-Pine Island, MN

octubre 2017 - agosto 2021

- Set up and operate tube bending machines (CNC and manual).
- Read and interpret blueprints, technical drawings, and work orders.
- Ensure accurate measurements using calipers, micrometers, and gauges.
- Monitor machine performance and adjust settings as needed.
- Troubleshoot bending defects (wrinkles, flattening, springback).
- Ensure proper material handling and minimize waste.

Leadership Responsibilities

- Supervise and support tube bending team members.
- Train new employees on equipment operation and safety procedures.
- Assign daily production tasks and ensure deadlines are met.
- Promote teamwork and maintain a positive work environment.
- Communicate production updates to supervisors or management.

Quality & Safety

- Inspect finished products to meet quality standards.
- Enforce company safety policies and OSHA regulations.
- Conduct safety meetings and ensure proper PPE use.

- Maintain clean and organized work area (5S standards).
