

# JUAN ANTONIO ESQUEDA

New Caney, Texas 77357  
832-247-6021 - Jaesqueda83@yahoo.com

## PROFESSIONAL SUMMARY

---

Dedicated and hardworking with a proven ability to adapt quickly to changing work environments and job requirements. Known for being a fast learner who consistently takes initiative to master new tasks and processes. Takes pride in delivering high-quality results with attention to detail and a strong work ethic. Eager to contribute to team success by tackling challenges head-on and maintaining a positive, solution-focused attitude.

## SKILLS

---

- **SAP Proficiency:** Skilled in running and utilizing SAP for operational and logistical tasks.
- **Blueprint Reading:** Experienced in interpreting and applying blueprints for precise assembly and troubleshooting.
- **Tool Expertise:** Proficient in using all hand tools, air tools, and specialized assembly equipment.
- **Equipment Certification:** Certified to operate overhead cranes and forklifts, ensuring safe and efficient material handling.
- **Oil Rig Expertise:** Extensive experience with all completion liner tools for oil rigs, including troubleshooting and technical problem-solving.
- **Technical Diagnostics:** Adept at identifying faults, diagnosing technical problems, and implementing effective solutions.
- **Bilingual Communication:** Strong communication skills with fluency in both English and Spanish, enhancing team collaboration and customer interactions.
- **Technical Documentation:** Skilled in reading and interpreting drawings, diagrams, assembly printouts, and part lists with accuracy.
- **Procedural Compliance:** Demonstrates the ability to follow formal service and operational procedures to ensure quality and safety.

## WORK HISTORY

---

### Mechanical Assembler II

**Baker Hughes** – Houston, TX

**04/2002 to 04/2025** (On-Site)

- **Assembled mechanical components** in alignment with bill of material requirements and engineering specifications to ensure accuracy and quality.
- **Performed functional testing** on assemblies and operated specialized test equipment to verify compliance with engineering standards.
- **Installed and routed pneumatic tubing** and prepared completed assemblies for shipment, maintaining precision and adherence to quality protocols.
- **Executed mechanical installation, maintenance, and equipment overhauls**, ensuring optimal functionality and performance.
- **Diagnosed and resolved mechanical faults**, disassembled and reassembled components, and conducted thorough visual inspections to maintain operational integrity.
- **Utilized inspection tools**, including micrometers and Vernier calipers, to ensure adherence to manufacturing tolerances and quality standards.
- **Completed, reviewed, and distributed quality records**, ensuring 100% traceability and compliance with documentation requirements.
- **Accurately entered and managed operational data** within the SAP system to support production and quality control processes.

## EDUCATION

---

**High School Diploma**

**Gonzalez High School - Gonzalez, Tx**
