Fort Collins, CO 80528 | +1 970 443 8653 | garza3238@gmail.com

Professional summary

Adaptable machine operator with 7+ years in production and quality control across manufacturing and warehouse settings. Proficient in operating CNC machinery, forklifts, and RF scanners while ensuring adherence to safety protocols and blueprints. Demonstrated success in maintaining clean, organized workspaces and executing detailed quality checks under fast-paced, shift-oriented environments.

Work experience

ORDER SELECTOR

US Foods | Loveland, CO

January 2024 to January 2025

- Operated electric and manual pallet jacks and forklifts to efficiently move and organize products for shipment, ensuring smooth production flow
- Utilized RF scanners and barcode technology to accurately track inventory and process orders, maintaining high order accuracy
- Picked, packed, and staged customer orders according to specifications, achieving 99% order accuracy
- Worked in various temperature-controlled warehouse environments selecting orders

QUALITY INSPECTOR/CALIBRATOR

Stored Energy Systems SENS | Longmont, CO

January 2023 to December 2023

- Performed quality testing on electrical power systems, running digital diagnostics to ensure product functionality
- Used multimeters and electrical testing devices to troubleshoot discrepancies and document issues accurately
- Collaborated with engineers to resolve product issues, ensuring compliance with quality standards
- Packaged units post-quality inspection and prepared them for shipment, maintaining production flow

PRODUCTION/CNC OPERATOR

Paravion Technology Inc. | Fort Collins, CO

January 2022 to December 2023

- Set up CNC machine (Fadal) per blueprint and work order to initiate production cycles efficiently
- Conducted quality checks on parts to ensure adherence to blueprint tolerances within ± 0.010
- Interpreted blueprints and schematics for assembly of aviation products maintaining industry standards
- Collaborated with supervisors and production leads to meet weekly production quotas and maintain quality
- Operated various hand tools consistent with manufacturing requirements

PRODUCTION LEAD

MM Solutions | Loveland, CO

January 2020 to December 2022

- Managed and trained production employees to maintain quality and meet organizational standards
- Customized crate building using carpentry skills and blueprint reading to fulfill client orders accurately
- Maintained quality control and organizational standards while consistently meeting production quotas
- Utilized pneumatic and hand tools safely and effectively in a manufacturing setting

Education

High School Diploma

HIGHLAND HIGH SCHOOL | Ault, CO

Skills

Machine operation

Quality control

Inventory tracking

Forklift operation

RF scanning devices

Blueprint reading

Hand and power tools

Time management

Basic math

Communication skills

Safety protocol implementation

Production documentation

Equipment cleaning and maintenance

Training and team collaboration
