I'm a hard worker, dedicated and motivated. I'm seeking a career within a company that I can stick with for a long time. My professional background stretches long and is broken up in a variety of different jobs. My work history in manufacturing, warehouses, and shops gives me strength and confidence that I can learn new skills. My work experience as a lead enables me to work with management, engineering, and quality to understand the job expectations, communicate with my team, and exceed company expectations. I take pride in all the jobs I do, and I am always finding better ways to do things.

EXPERIENCE

June 2024- present

ARC- Houston Texas

- Building and rebuilding robotic welding tables, skids and platforms
- Customizing a variety of robotic welding machines, working together with engineers, programmers and managers to exceed in our products and costumers' expectations.

June 2023- June 2024

NOV- National Oilwell Varco. Houston Texas

- Clean and inspection the BOP machine
- Maintenance clean out and repair BOP machine to perform functional test.

January 2023-February 2023

Rio Hydraulics and Marine Houston Texas (contract job)

- Mobile Equipment
- Restore and repair cylinder and Hydraulic Hoses

December 2022-January 2023

Technician Mayekawa USA Inc Katy

Texas (Contract job)

- Motor alignment

September 2022-December 2022

ASSEMBLER III MiTek. HOUSTON TEXAS

- Assemble custom tables used for cutting plywood for houses or building.
- Transport tables to the assembly line and painting.
- Assemble gearboxes.
- Blueprint reading.
- Controlled 20-ton crane to move the tables from the assembly area to the quality control

area.

- Working close with managers and the quality control department.
- Reviewed and implement changes to BOM with QC and engineering.

July 2022 – September 2022

ASSEMBLER III REEL POWER. HOUSTON TEXAS (contract job)

- Rebuilt units (loc torus).
- Test Units that are going to be use in the oil field.
- Blueprint reading.
- Disassemble drill bits from the oil field, do the maintenance assemble back and get them ready for shipping.
- Moved the drill bits to the maintenance area with a 20-ton crane.

March 2022 – May 2022

ASSEMBLER III Lift Moore. HOUSTON TEXAS (contract job)

- Pull the parts to the next item on production schedule.
- Preassembly on all lifts.
- Blueprint reading.

FEBRUARY 2022 – MARCH 2022

ASSEMBLER III KF VALVE. HOUSTON TEXAS (CONTRACT JOB)

- Pull the parts for the next valve on the production list.
- Assemble valve according to drawing.
- Blueprint reading.

JANUARY 2013- OCTOBER 2021

LEAD MEN/MECHANICAL ASSEMBLER III ATLAS COPCO. HOUSTON TEXAS

- I was in charge of assembling dryers and compressors on a flow line to companies' special orders which, may contain ¼ inch stainless steel tubing.
- Cut and thread ½ to 2-inch pipe.
- Pressure test and test dryers to customers' orders which contains downloading program and also troubleshooting dryers.
- Do engineer projects upon costumer's request.
- Certified in safety training.
- Certified to drive 150-360 Hyster.
- Able to read BOM on travelers according to costumer's orders.
- Responsible for overseeing and performing the assembly, testing and inspect operations.
- Able to fill out disposition form when BOM was incorrect.
- If parts are damage, I'm able to fill red tag.
- Great leadership skills, responsible for mechanical assemblers and welder's area. Lead team of 5-15 people.
- Pull the parts to the next item on production schedule.
- Preassembly on all lifts.
- Blueprint reading.
- Used 20-40-ton crane to move piping.
- Used laser levels to align vessels.
- Used mag drill to drill out holes for the vessels.
- Help deburr machine parts.
- Working close with managers, quality control department. And go over BOM with QC and engineering.

SEPTEMBER 2010 – AUGUST 2012

MECHANICAL ASSEMBLER II STEWART AND STEVENSON. HOUSTON TEXAS

- Assembled fracturing trucks on the flow line company specifications using micrometers, dial bore gauges and depth micrometers.
- Reviewed blueprints, diagrams and contract specifications.
- Handled transferring components using 10 to 20-ton crane.
- Certified as operation of Hyster 85, 155 and 360 sit down fork lift.
- Blueprint reading.
- Used mag drill to drill holes to align pumps and motors with laser alignment.

JANUARY 2009- SEPTEMBER 2010

MECHANICAL ASSEMBLER RINEER HYDRAULICS. *SAN ANTONIO TEXAS*

- Assembled and disassembled prototype Tesco hydraulic motors.
- Performed dyno test of hydraulic motors and made final adjustments.
- Facilitated construction of hydraulic motors to precise measurement using micrometers, dial-bore gauges, and depth-micrometers.
- Prepared motor identification by affixing serial numbers and warning labels.
- Blueprint reading.

JANUARY 2007- 2009

ADDITIVE INJECTOR TECHNICIAN HAMMONDS TECHNICAL SERVICES. *HOUSTON TEXAS*

- Configured and assembled prototypes and finished designs for the production of Technical Aviation Fuel mixing units which were then sent to Iraq for military application Built and tested units by making final adjustments to check valves and providing quality assurance for final inspection.
- Used blueprints in the construction of turbine and rotary vein drive units
- Provided assistance in building crates for shipment and placement of product identification and warning labeling.

EDUCATION

Parkview Baptist Houston, TX

SKILLS

- Excellent communication skills
- Work independently and within a team
- Team leadership and interact with management
- Problem solving
- Creativity
- Time management
- Organization
- Teamwork
- Adaptability
- Critical thinking
- Decision making
- Customer service skills
- Self-management
- Willingness to learn
- Excellent hand-eye coordination
- Attention to detail
- Exceptional ability to multitask
- Mechanical aptitude
- Proficient in reading blueprints and renderings
