

Professional Summary

Richard is a Quality Inspector in purchasing and materials management with over 20 years of experience in Quality Inspection. He is well versed in performing incoming, in-process and final inspections using a variety of hand tools and test equipment, including calipers, verniers, height gages comparators, micrometers, and profilometers. He is proficient in reading and understanding blueprints and engineering specifications. He has extensive experience in maintaining records of inspections and test result. He holds Associate Degree in Purchasing & Material Management. He is local to MA and is available for Phone/in person interview.

Professional Synopsis

- Experienced in Inspection of incoming, in-process and final materials to engineering specifications in an ISO regulated system Experienced in Angular JS structural framework for dynamic web apps.
- Good Experience in Maintaining quality records, initiate DCO generation and non-conforming reports. Experienced in developing and delivering the mobile applications on Android platforms.
- Well versed in using calipers, verniers, height gages, comparators, micrometers, and profilometers.
- Responsible for Insect incoming and in-process materials to engineering and customer specification in a FDA regulated environment.
- Proficient in preparaing reports and responsible for product release.

Professional Experience

Synventive, April 2017 to August 2017

Quality Inspector

- Inspect incoming and in-process materials to manufacturing and engineering specifications, prepare reports, maintain quality records and update data base.

LeMaitre Vascular, September 2016 to February 2017

Quality Inspector

- Inspect incoming and In-process materials and assemblies to engineering specifications.
- Prepared reports, updated system.

Hologic Inc., November 2015 to May 2016

Quality Inspector

- Responsibilities Insect incoming and In-process materials to engineering and customer specification in a FDA regulated environment. Kept and updated records. Responsible for product release.

Paradigm Precision, February 2015 to September 2015

Quality Inspector

- Responsibilities Inspect complex incoming and In-process materials to engineering specifications utilizing various measuring tools and devices. Maintain quality records.

MKS Instruments, 2013 to 2014

Quality Inspector

- Inspect incoming materials to quality specifications, test material if special processing is needed • Maintain Quality records, Disposition defective materials through MRB processes and input quality results into database.

Conformis Inc, 2011 to 2013

Quality Inspector

- Inspect incoming and in process implants and components to engineering specification.

- Maintain quality records, initiate DCO generation and non-conforming reports.
- Disposition defective materials and prepare finished reports. Release final product for shipment.

Omni Life Science, 2011 to 2011

Quality Inspector

- Inspect incoming, and in-process materials to engineering specifications in a FDA and ISO environment.
- Identify non-conforming materials and follow through MRB process.
- Isolate product and maintain quality records.

Copley Controls 2009 to 2010

Quality Inspector

- Inspect incoming, in-process and final materials to engineering specifications in an ISO regulated system.
- Identify non-conforming components, and disposition them through the MRB process.
- Responsible for final product release to shipping.

Waters Corporation, 2009 to 2009

Quality Inspector

- Inspect incoming, in process, and final materials and components to quality specifications.
- Disposition defective materials through the MRB system, maintain quality records, input results into database.

Ranfac Corporation, 2008 to 2009

Quality Inspector

- Inspect incoming, in process and final components to engineering specifications • Perform reliability tests and audit ISO requirements.

Catholic Memorial High School, 2007 to 2009

Maintenance Assistant

- Responsible for overall facility maintenance of two buildings.
- Including upkeep of interior and exterior of buildings and grounds.
- Light electrical and carpentry duties as required.

General Dynamics, 2004 to 2005

Incoming Quality Inspector

- Inspected incoming materials and machined assemblies to engineering specifications dispositioned defective product, documented results, prepared reports, audited quality system.

John Buonomo, 2001 to 2003

General Contractor

- Maintain work area utilizing cleaning equipment such as vacuums, brooms, brushes and power equipment as necessary.
- Paint and clean woodwork and floors, wash windows, maintain tooling and replace used equipment as needed.
- Performed light carpentry and electrical maintenance as requested.
- During winter months, removed snow and ice from customer properties utilizing snow throwers and chemical compounds.

Mitek Surgical, 2000 to 2001

Incoming Quality Inspector

- Inspect incoming and in process raw materials and finish goods to engineering specifications • Responsible for disposition of defective materials to MRB.

Past Experience

Zoll Medical Corporation

Precision Mechanical Inspector

- Inspect, test, and verify incoming materials to engineering specifications
- Document results and disposition defective materials
- Interface with internal departments and vendors on problem solving. Audit quality system in an ISO environment.

Aseco Corporation, Marlboro

Quality Assurance Inspector

- Inspect complex incoming fabricated parts to geometric tolerances utilizing a variety of hand tools and surface set-ups as well as optical aids.
- Test assemblies for quality compliance and maintain quality records and files on database.

Panametrics Corporation

Quality Assurance Inspector

- Inspect and test incoming materials to mechanical and electrical specifications. Prepare discrepant material reports and maintain quality records.

MA-Com,

Quality Assurance Inspector

- Inspect incoming materials to quality specifications utilizing existing measuring tools and devices.

Temptronics Corporation

Quality Assurance Inspector

- Inspect and test incoming, in-process and final materials and products to mechanical and electrical specifications. Prepare discrepant material reports and maintain quality records.

Education

- Associate Degree- Purchasing and Materials Management - Northeastern University - Burlington, MA

Certifications/Licenses

- Certificate in Electronic Tester Training Massachusetts Bay Community College - Wellesley, MA
- Electronic Testing Cert.
