Sierra Space

April 2021 to February 2023

(Visual and Dimensional Inspections, Book Reviews)

- Perform accurate mechanical, physical and visual inspection of raw materials, components, and sub-assemblies per Inspection Plans, drawing and other specification requirements
- Ensure calibration and maintenance of inspection equipment is up to date prior to conducting inspection operations
- Communicate with project engineers to ensure compliance with the final product requirements
- Document information in various databases and other internal programs on the computer
- Assist Quality Engineers with conduct of First Article, in-process and final inspections
- Work with Costpoint and/or AEGIS-MES
- Understand material flow in operations
- Understand and interpret technical schematics and drawings
- Interpret geometric dimensioning and tolerance as well as technical schematics and drawings
- Knowledge of ISO 9000 and AS 9100 standards

Quality Inspector

Vestas Nacelles Facility

April 2019 to February 2021

(Inspections, NCR, MRB)

- Worked on Dispatch Inspection before shipping to the customer
- Had control over the NCR area from ordering replacement parts to fixing defective material to sending back to vendors
- Ran the MRB for the company and made decisions on dispositions for all parts
- Did in line inspections for all Nacelles and Hubs in the manufacturing process
- Took part in Quality focus points within the factory
- Worked on focal points from site NCs to improve Quality
- Worked with test to improve Quality on The Manufacturing line

Quality Engineer

Lockheed Martin - Boulder, CO

June 1997 to March 2018

(Software, Hardware and Test Engineering)

- Performed hardware quality responsibilities which included rack inspections, interconnects, cable tables, I&COs, installs and involved in peer reviews for all of the hardware products
- Performed Supplier Quality Audits, Certifications, Factory Acceptance Testing, and Non-Conformance Resolutions
- Represented QA at the Hardware Control Board and in customer facing meetings
- Performed in process inspection and audits, ISO and CMMI audits, software test witnessing, closing work orders, approving material requisitions and the selloff systems to the customer
- Lead QE for all integration and verification for ground and worked with the all system test for SEIT
- CAM Point of Contact for 6 years which included writing VARs, WADS, CEACs and also completed proposals for the Quality Organization
- Backed up the Program Manager on real life rehearsals at a separate government site
- Selected to be the QE assigned to a multi-million-dollar project that was turned over to the government
