EXPERIENCE

Penske Truck Leasing, Denver, Colorado,
Luber / Preventative Maintenance Tech.

2000 - 2013

Fuel and check all incoming trucks, check fluids, belts, tires and other items for all Customers entering the Fuel Island. Take care of any customer issues and Make minor repairs. Promoted to Luber PM Tech in 2002. My responsibilities for Luber PM are as follows: Preventive Maintenance on all Fleet Company vehicles and all Lease customers. This includes Diesel and Gasoline Trucks. The fleet has Semi tractors and trailers, all sizes of Box trucks and Refrigeration trucks. We work on all Engines and Models. I also did minor repairs and some diagnostic work checking for codes. Repairs included replacing tires, Lights, Mirrors, Belts, Water pumps, Hubs and Various other jobs. Customer Service required Working with Customers taking care of all their concerns and doing quick inspections and repairs to get them back on the road. I would also Deliver and pick up trucks, trailers and various auto parts.

Designers Choice, Peoria, Arizona
Stainless Steel finisher / Polisher

1995 - 1999

Briefly describe work achievements and duties

- Began on polishing line which includes polishing restaurant equipment to meet N.S.F standards. This requires various techniques in air tools such as, angle grinders, die grinders, flap wheels, and shakers. I also worked with metal working hammers and dollies. I was later promoted to the quality control department which made me responsible to check all stainless steel equipment coming off the polishing line to ensure it meets Q.C. standards and follows the blue print specifications.

Eagle Picher, Colorado Springs, Colorado
Machine Operator

1994 - 1995

Operated various machinery for precision sheet metal fabrication shop. Various duties including De-burring, working on drill press, sheer press, Brake press, punch press, ban saw, pem sserter, spot welder machine, heli ark welder, mig welder and fork lift.

Standley Tool Company, Shelbyville, TN.
Machine Operator

1993 - 1994

worked in Polish department: duties included working on automated grinders, baters, polish machine and punch press. Worked on hammer heads and crow bars.

Karsten Manufacturing / Ping Golf Clubs, Phoenix, Az.
Machine Operator, Assembly, Health services E.M.T.

1973 - 1993

Warehouse work: unloading and stocking merchandise, checking invoices and ordering parts. Held position of lead man for several years and then promoted to the Woods dept. In the woods department I ran various machines for sanding and grinding wood heads and soul plates. I also trained people to run the various machines we had for production. I also Designed and Built left and right hand molds for wood heads for the assembly table. This improved production and safety. I was able to work with the Engineers making suggestions to improve our automated machines and making them easier to operate. After the improvements were made the machines were built to incorporate the improvements. I also worked as one of the company Emergency Medical Technician's and helped in the nurses office as a first responder. I

worked in the machine shop, I was in charge of shipping and receiving, verified shipping schedules, checking parts and responsible for packing and shipping of government contract parts. With security clearance. I also drove a fork lift and assisted with DE-burring running drill presses etc. in my 20 years at Karsten Mfg. I worked in many departments learning many aspects of the company.
