I was the first woman in the state of Colorado to be certified into the International Association of Machinists and Aerospace Workers. I'm usually the only woman in just about every shop I've worked in. It makes it a fun challenge to earn the respect of my fellow machinists. Once they see me in action, they know I'm a great machinist.

I'm a knowledgeable CNC Machinist skilled in set-up/operation of a multitude of CNC Machinery including lathes and mills, as well as manual machines. Comprehensive in G-code. Fanuc Controls on Mori Seiki but I am knowledgeable in Cincinnati, Mazatlan, Haas, Brother, Okuma, etc

I have the ability to review work orders and run several different machines simultaneously by creating a 6S environment for myself as well as my peers. Excellent at following orders and going through each process thoroughly and effectively.

I have Lean Manufacturing experience and have been chosen to lead in the implementation at Alcoa Packaging Machinery and several other companies. I have 20 years of experience with a Machinist Apprentice Certification and an Associates in Machining Technology. I'm a team player plus a self-motivator, have a very positive attitude with the commitment to safety, continuous improvement, quality, customer service and lean manufacturing.

I practice Continuous Improvement with just about everything I encounter in life. It's a fun habit and am very willing to learn.
