Experienced manufacturing expert with a demonstrated history of working in the facilities service industry. Skilled in meeting deadlines, attention to detail, quality assurance, trouble shooting, and high mechanical aptitude. Strong manufacturing experience with a top notch skill set.

Authorized to work in the US for any employer

Work Experience

CNC Operator

MOYER MACHINE AND TOOL, LLC

August 2020 to Present

- On average I am operating two to three CNC machines everyday. Responsible for loading machines, deburring, tumbling, and finishing parts.
- Quality checks on finished parts ensuring products are within required specifications.
- Operated forklift and heavy equipment including Hem Saw, Mori Seiki, and overhead crane.
- Maintain coolant ratio and filling machines with coolant and oil.

Mechanical and Electrical Technician

Left Hand Robotics

August 2019 to March 2020

- I had a variety of responsibilities with the primary purpose of hands-on construction (wiring, assembly, programming, etc.) of robots, as well as creating the manufacturing tools and processes that build the robots.
- Assisted manufacturing, mechanical, and electronics engineers in all phases of the robotic design, development, production, testing, and operation
- Experienced manufacturing engineers in all phases of the robotic design, development, production, testing, and operations.

Lead Automation Technician

RXAS

September 2016 to August 2019

I had a variety of responsibilities with the purpose of leading specific projects and also to develop and provide high quality, leading edge sustainable engineering solutions to clients in the pharmacy industry.

Lead Laser Operator

SPECIALTY PRODUCTS COMPANY

2014 to 2016

- Set up and operated laser cutting machine.
- Cut parts to customer requirements to produce a finished product of the highest quality and consistency within tolerances and specifications required by the customer.
- Operated presses, CNC machines, press brake machines and more.

Education

GED

Fort Dodge High School

2005
