WORK EXPERIENCE

report any accidents or traffic violations to supervisor

Waltco Delivery Service Inc - 2016-04 - Present

04/16-Present

Responsible for delivering parcels to various locations and places of business. In charge of planning out the most efficient route for deliveries, as well as proper scanning of all packages, and use of scanners throughout the route. Responsible for pre-trip inspection of truck and proper documentation of any repairs needed. Provide exceptional customer service, and a safe and timely delivery to all accounts. Make sure to keep your vehicle clean, and to return to hub with your vehicle fully fueled. Lastly, report any accidents or traffic violations to supervisor immediately.

Assembler/Production

IEA (Engendren) - Kenosha, WI - 2012-06 - 2016-04

Perform quality inspection on units prior to assembly by quality testing and inspecting the product. Perform repairs on assembly leaks and soldering weld leaks as needed. Verification of correct pipe and coupling locations by reading blue prints, inspection of paint quality on parts, and assuring all parts are of the highest quality. Responsible for soldering copper and brass filler necks, over flow tubes, weld leaks, and tube to header core leaks. Repair assembly leaks as needed during the quality testing phase of production by submerging and pressurizing the units in water tanks to ensure durability and quality of the product, repaint areas on parts as needed. Enter job information into computer for assembly and water testing status updates. Skilled in the use of a 2-3 ton overhead crane and capable of loading and running a fin press machine. Heavy assembly of industrial radiators for Caterpillar and Cummins units. Served on the safety committee for a year and a half, and wrote the I.E.A. safety guide for employees and new hires.

Project Manager

Allscape - Round Lake, IL - 2007-05 - 2012-04

Responsible for driving landscaping crew to and from work sites, and supervising work and landscape accounts. Part of landscape design team specifically involving mulch work. During winter months I was responsible for managing snow removal accounts as well as snow removal.

Plumber Apprentice

Biagi Plumbing - Lake Bluff, IL - 2003-10 - 2007-04

As an apprentice plumber, I worked under a Master Plumber on daily basis gaining full knowledge of all aspects of plumbing. Apprenticeship started with work done on sewer repairs, rough plumbing, and drain tile repair. Then I elevated to new construction work consisting of gas and copper piping as well as some trim work. I also worked on special project at Bahai Temple in Wilmette, IL constructing fountain reflecting pools. This particular project involved complicated mathematical scenarios as well as welding and threading of brass piping. Also have experience in utility locating.

Order Selector

Medline - Waukegan, IL - 1999-03 - 2001-01

Worked 3rd shift on picker line insuring quality and verification of orders picked. Worked in department involving sterilizing medical equipment, and received and took inventory of product in the warehouse weekly. Properly placed stock and pulled orders involving the operation of several types of fork lifts.

Supervisor of freight and shipping

Uline - Waukegan, IL - 1997-02 - 1999-02

Supervisor of freight and shipping in packing material department overseeing the picking, packing, and loading of material. Also supervised temporary employees on daily basis ensuring quotas and quality standards were met. Prior to this position, I was on the picker packer UPS line ensuring accuracy of orders picked, weight limit requirements were not exceeded and material was packed properly. I also worked in receiving department unloading trucks and checking in product received nationally as well as internationally. I was Involved in special project requiring set up and organization of warehouse specifically for corrugated boxes.

Temp to hire position specifically

Fritz Co - Bensenville, IL - 1996-04 - 1997-01

Temp to hire position specifically for Emerson Radio returns department. Responsible for breaking down of pallets of returned product received, entering model numbers into computer system accurately and placing on line. Also worked at end of the line removing and placing product by model number into inventory. Permanently hired after 30 days due to exceptional work ethic displayed, and was placed into overseeing operations position at the end of the line. Worked on special projects involving the international area of the warehouse; breaking down and receiving international barge pallets that involved U.S. customs.
