Work Experience

Owner and Founder

LVC LLC - Las Vegas, NV

September 2017 to May 2019

I owned and operated my own construction company as a subcontractor within the Las Vegas metropolitan area. As a business owner I answered my own phone calls, and emails. I met with other contractors, and clients to walk through properties/ job sites that were current contracts, as well as potential contracts. I scheduled appointments with clients, put in bids on jobs, and completed renovations as scheduled.

Umpire/Referee

ArbiterSports - Denver, CO

March 2016 to September 2017

With ArbiterSports I was a baseball umpire. I officiated adolescents ranging from 7-17 years old. I was required to show up 25 minutes prior to each game, suit up, meet players, coaches and officiate the game. I was in charge of the players, coaches and parents etiquette on and off the field. Arbiter sports relies on officials to be professional, and on time because these officials are the only personnel present. If an official isn't on time, the games cannot start, which is important because the outcome of that only affects the children and the parents. Mainly this was a secondary job, that requires patience, and fantastic people skills.

Production Worker

BASF Corporation - Brighton, CO

April 2016 to April 2017

At BASF I was a production line/ machine operator. I was in charge of making sure the chemicals that my line was running were on time to my line, hooked up properly, and the machine was properly as well as efficiently producing product. I met with the facilities quality control lab 3-4 times a shift to ensure the product was proper. I hand packed boxes with the product coming off of my line. When the product was packed and labeled properly I stacked the boxed product on pallets, and prepared the pallets for shipment.

Mailroom Associate

MCS - Westminster, CO

February 2015 to April 2016

I worked with software engineers, coders, and telecommunications specialists on site for Avaya. I was in charge of all incoming, and outgoing mail as well as packages throughout the campus. Whether it was usps, ups, fedex etc. I received and delivered all incoming mail for the 1200 employees on the campus. I had to pick up all outgoing shipments all around the campus, put postage on the parcels, and made sure they went out on time.

Utilities/ Dishwasher

HMSHost - Denver International Airport, CO
January 2014 to February 2015

At HMSHost I delivered food to multiple restaurants on all the concourses at Denver International Airport. After stocking the restaurants I would spend the rest of the shift washing dishes at whatever restaurant that was short handed that particular day.

Crew Trainer

McDonald's - Brighton, CO
October 2011 to November 2013

At McDonalds I started as a crew member in which would have been my first job during high school. I quickly became a crew trainer, and trained all new employees. Before becoming the store trainer I ran the cashiers, drive thru, grills, and fryers.

Business Owner

Education

High school or equivalent

Heritage Academy - Commerce City, CO
September 2009 to June 2013

High school or equivalent

Skills

- Telecommunication
- Quality Control
