Work Experience

Customer Engineer

NCR-Arizona

January 2023 to Present

Perform electromechanical repairs and installations on ATMs throughout the territory. Manage software configuration, diagnose network faults and remote system access. Collaborate with branch staff and external IT departments. Provide excellent customer service to branch staff. Maintain a van stock of parts and tools needed for repairs and calibration. Work with team members and dispatch to close calls as efficiently as possible.

Field Materials Technician

Quality Testing-Chandler, AZ

May 2022 to November 2022

Perform testing, inspections and observations for earthwork, asphalt, concrete, rebar and Post-tension construction. Read and understand plans to ensure work is being completed in accordance with technical specifications. Manage relationships between testing, inspectors, and contractors. Generate reports and document non-compliance in a clear and concise manner.

- ADOT I-17 Paving from Mund's Park to Flagstaff
- Soil and Concrete at Copper Basin Wastewater Treatment Facility
- Training new Technicians

Construction Inspector

CSEM-Phoenix, AZ

February 2022 to June 2022

Perform inspection and observation for ADOT construction work. Travel to remote locations and ADOT field offices. Compile reports and daily logs of projects. Manage communication between contractors and ADOT. Ensure construction to ADOT standards.

- I-17 Flex Lane Project suspended

Engineering Materials Technician II

Terracon Consultants Inc-Tempe, AZ

August 2020 to December 2021

Perform testing on construction sites to assure compliance with technical specifications. Perform compaction testing on soils using Nuclear Density gauge and Sand Cone. Sample concrete and test slump, air content, and create test cylinders. Sample asphalt, establish rolling patterns and check final Densities. Work with clients to understand results and ensure work is completed to specification.

- Led and trained a team for Clayco project requiring concrete beam testing
- Principal asphalt technician

Construction Materials Testing Technician

Western Technologies, Inc.-Phoenix, AZ

October 2018 to August 2020

Perform testing on construction sites to assure compliance with technical specifications. Sample concrete and asphalt for quality control and laboratory testing. Sample and test soils and fill for compaction and moisture using Nuclear Density Gauge.

- Achieved ACI Field, ATTI Soils, Nuclear Safety Certificates

Site Manager

Ricoh USA,-Phoenix, AZ

March 2017 to August 2018

Manage daily site operations including training and supervising team members, compiling and reporting metrics to our client contact, and ensuring Service Level Agreements are met. Use previous knowledge of Electronic Document Management to consult with client contact, internal IT, and other departments to create a robust process for digitizing client records.

- Designed and implemented systems to track accuracy and output in pages, files, boxes and disk space.
- Reworked client software and processes and enhanced our output to twice that of other scanning teams
