Work Experience

Machine Operator

Hach Company - Loveland, CO

February 2021 to Present

I work in the SMT area for Hach. So we gather boards for assembly's we plan to run later that day or night. Then we go through the whole process of putting either leaded or unleaded paste onto the boards. Then we would load the assembly program onto our pick and place machines. We will trouble shoot issues that we have while running the assembly. Then we have a inspection area where we verify the correct parts have been placed onto the circuit board. If we come across any errors with soldering or if we have wrong parts. We fix it at this area before sending it off to pcba or our second building.

Education

High school diploma

Longmont, CO

August 2013 to May 2017

Skills

- Surface Mount Technology
- Quality Inspection
- Fast learner
- Schematics
- SolidWorks
- Manufacturing
- Blueprint Reading
