Work Experience

Machine Operator

Tmp - Fort Collins, CO

February 2020 to Present

Being a machine operator for tmp i would clip cow calf and feedlot tags flush. I would start my day with grabbing molding spray to help the plastic come off the mold and a rag to wipe the extra spray off. I would then have the person on the machine get everything in place wait for the machine to open grab the tags clip them check for defects stack them in the certain amount over lap once cool in the box. At the end of the day i would clean up for the next shift.

Field Hand

iNovate Solutions - Wiggins, CO

October 2019 to September 2020

My day to day work as a field hand in the oil field was to set up and tare down generators with lights attached to them.

Hood Technician

Grease Monkey - Greeley, CO

February 2018 to November 2019

As a hood tech i would change oil and filter, with the specified oil and filter in a certain amount of time. My day to day job would look like get myself set up or the day while waiting on customers from appointment to drive up. Getting the car pulled in checking fluids and the battery charge while the oil would be draining. After talk to the service advisor so they can tell them what needs to be fixed what is good and what is going to need attention.

Auto Mechanic Apprentice

Nissan - Greeley, CO

June 2015 to October 2016

As an apprentice i would shadow as well as perform my tasks for the day from a small alternator to a large job such as engines.
