Millwork	Calipers	Routers	Drill Press	Debur	Assembly	Fork Lift	Sand Blasting
Carpentry	Trim Work	Siding	Remodel	Power Tools	Air Tools	Gauges	Hydraulic Press

Experience

Plastic Fabrication/Machine Shop

Commerce City, Colorado

Thermoplastic Fabrication Incorporated TFI

- All phases of plastic fabrication including measuring, cutting, router, machining and welding of various types of plastic materials by priority and due date
- Custom carpentry work done for the crating, packing and shipping of various products
- ISO certified. Lot numbers critical for the tracking of all materials from start to finish
- Forklift duties required. Custom millwork done as new products and processes were implemented

Metal Fabrication/Machine Shop

Niwot, Colorado

Veris Incorporated

- Organized, consolidated, inventoried, fabricated and prepared various types of metal by due dates and priority
- As the department lead I handled all ordering, stocking of all raw materials as well as transferring and tracking all lot numbers for ISO traceability
- Quality and process checks throughout department. Cut tolerances at 0030. of an inch. Calipers and blueprints used to verify tolerances. Then deburring, sandblasting, beadblasting, hydraulic press, millwork and lathe work were also some of the process requirements.

Metal and Aluminum Fabrication/ Machine Shop

Henderson, Colorado

Meritt Truck Equipment

- 10' and 20' accushears used to cut various steel and aluminum parts to meet blueprint and process specifications.
- Notcher, iron worker, band saws and drill presses also used to meet blueprint specifications
- Overhead crane certification required to lift various materials onto shears for cutting.

Production and Assembly/Production Shop

Brighton, Colorado

Vestas Blades America

- Sub assembly of various webs according to blueprints and processes outlined in department
- Communicate with team as well as various engineers on new ideas, processes or tools that can be implemented to improve quality or production processes
- Overhead crane certified so able to crane webs into bulkheads and as turners to be inspected to finish department process

- Communicate with other crane operators in other departments to utilize the timing I use the cranes so that all departments can maintain a fluid flow rate with one another
- Ability to meet all expectations for quality hold points as well as all process requirements
