**Management Professional, Senior Manager, Supervisor, Team Leader,  
Production Maintenance & Automation Assembly Technician**

Professional management individual with over 25 years experience in technically oriented fields. Excel at team building and optimization. Focused on individual, team, and company related success through proven leadership and management techniques. Always focused on improving processes and procedures through strategic planning to obtain optimal results, reduce cost, increase efficiency, and grow revenue.

---

**Proficiencies:**

Lean Sigma • Team Coordination • Reading Comprehension • COGS • Critical Thinking • Employee Monitoring • NCR's/ECO's • Writing • Speaking • Active Listening • Social Perceptiveness • Management of Personnel Resources • Active Learning • Persuasion • Negotiation • MRP/ERP • Complex Problem Solving • Operations Analysis • ISO 9000 • Judgment and Decision Making • Time Management • Systems Analysis • Learning Strategies • Systems Evaluation • Management of Material Resources • SOP's, MPI's, IPI's • Instructing/Nurturing • Service Orientation • Management of Financial Resources • Operation Monitoring • Mathematics • Design of Experiments • QC & Quality Control Analysis • OSHA Training • Sub-assembly & Systems Testing • cGMP • Project Management • Mentoring • JIT • PP&E, MRO • Kanban, Kaizen

---

**Experiences:**

**Oralabs, Inc.** March 2016 - Present

Develops, manufactures, and distributes cosmetic and medicated products under a variety of popular brands. The worlds largest manufacturer of these product types using automated and semi-automated equipment.

**Maintenance Manager** manages team of 10 production maintenance technicians, building and maintaining advanced automation machines using knowledge of mechanical & electrical components, electronic circuits, computerized systems, and pneumatics. Reports directly with Director of Operations to ensure proper integration of all groups within the facility. Works closely with Mechanical and Electrical Engineers in research and development, purchasing, manufacturing, installation, support, and repair of developed/purchased machines. Interfaces with Management group, Production group, Quality group, and related sub-groups in Laboratory, Labeling, Packaging, and Shipping. Developed internal CMMS for maintenance work orders. Order and maintain inventory of all machine parts & components. Conduct employee assessments, promotions/demotions. Develop SOP's, address CAPA's, prep for FDA and Third Party Audits, and perform Strategic Planning based on Data Analytics.

~~~

**Tension Packaging and Automation Corp.** October 2011 - November 2015

Develops, manufactures, installs, and supports automated packaging and order fulfillment systems for Pharmaceutical Distribution and Direct-to-Consumer markets.

**Production Supervisor** managed team of up to 15 mechatronics technicians building advanced automation machines using knowledge of mechanical & electrical components, electronic circuits,

computerized systems, pneumatics, hydraulics, and robotics. Worked directly with Operations Manager to ensure proper integration of all groups within the division. Proficient in reading and understanding blueprints, schematics, and drawings. Worked closely with mechanical and electrical engineers in research and development, manufacturing, install, support, and repair of developed machines. Oversaw all of production floor and UL 508A control panel build shop. Performed employee assessments, promotions/demotions. Created project files to track projects and managed from inception to completion.

~~~

**TriStar Systems Corp.** August 2008 - September 2011

Created, manufactured, installed, and supported automation machines for various commercial and industrial applications.

**Supervisor, Lead Technician** lead team of mechatronics technicians building advanced automation machines using knowledge of mechanical & electrical components, electronic circuits, computerized systems, pneumatics, hydraulics, and robotics. Worked directly with owner and engineers to ensure proper integration of all groups within the division. Proficient in reading and understanding blueprints, schematics, and drawings. Worked closely with mechanical and electrical engineers in research and development, manufacturing, install, support, and repair of developed machines. Oversaw production floor and scheduling of workflow.

~~~

**R & P Property Services, Ilc.** November 2007 - June 2008

Property management group maintaining multiple properties throughout the Denver metro area.

**Maintenance Supervisor, Technician** maintained HVAC systems, controls, electrical, lighting, and specialized equipment at various Lockheed Martin secure facilities. Held high security access. Lead team of maintenance and janitorial personnel through daily operations and emergency situations. Developed computer based files, emails, and spreadsheets to assist primary goals.

~~~

**Denver Industrial Pumps, Inc.** February 2005 - July 2007

Distributor of commercial, industrial, and municipal pumping equipment.

**Sales Engineer, Technician** performed inside & outside sales and assisted start-up of controls, motors, pumps and related equipment. Called directly on civil engineering professionals to integrate products into specifications. Increased sales for municipal market by 300%. Performed computer document development and optimization related to objectives.

~~~

**Peak Pump Sales, Inc.** March 2000 - February 2005

Distributor of commercial, industrial, and municipal pumping equipment.

**Sales Engineer, Technician** performed inside & outside sales and assisted start-up of controls, motors, pumps and related equipment. Called on construction contractors and engineers to sell products into upcoming projects. Performed computer document development and optimization related to objectives. Setup, maintained, and updated all computing, networking & related systems.

~~~

**Janssen Pump & Equipment, Inc.** October 1989 - July 1998

Distributor of commercial, industrial, and municipal pumping equipment.

**Applications Engineer, Sales Engineer, Technician** performed applications engineering, inside sales, and assisted start-up of controls, motors, pumps and related equipment. Fielded end user calls for repair parts and maintenance instructions. Performed computer document development and optimization related to objectives. Setup, maintained, and updated all computing, networking & related systems.
