July 2019

**RE: ZipRecruiter**

**Dear Hiring Manager,**

I have been living in Chiang Rai, Thailand, for the past three years. Born in Denver, I have returned to live closer to my elderly mother and siblings who all live in Colorado. I am currently living in Fort Collins, Colorado. But, would be interested in role outside Fort Collins in the Denver metropolitan area.

Most recently, I have been working as a consultant for the marine geophysical service sector focused on Asia-Pacific projects. However, the industry has been depressed since mid-2014 and I am interested in broadening my skillset. I possess a number of transferrable skills and experience. I possess corporate e sales and business development experience. I am adept at learning new processes and software through my several years working in data processing and analysis. This includes using office suite software (i.e., MS Office™) for client and in-house presentations and communication, but also a number of hardware and software applications used to statistically analyze complex geospatial/seismic datasets. I also have strong oral and written communication skills and experience which includes in-house and external presentations, as well as writing or revising documentation. I am a systems thinker and have received ISO 9000 Quality Management System (QMS) Lead Auditor training which customer focused for continual improvement.

I am a team player and practice clear communications to all stakeholders as the key to operational success. I have worked within a variety countries and cultures. I have attached a copy of my resume/CV for your perusal. I would very much like the opportunity to discuss how I could help your organization.

Thank you for your thoughtful consideration,

Steven D. Kalavity
