“A jack of all trades is a master of none, but oftentimes better than a master of one.”

This famous adage has always resonated with me, perhaps because I prefer to be a generalist as opposed to a specialist and enjoy being versatile and adept at many things.

Work Experience

Learning Ambassador

Amazon Sortation Ctr - Commerce City, CO

December 2021 to Present

- Teach day 1 class, presentation and site tour to explain rules and policies to new associates: 1-on-1 or groups up to 15 people.
- Act as liaison between management and associates, aiding in the identification of fluctuating priorities and offering positive solutions to keep up with daily volume.
- Following up and answering questions/providing guidance to new associates in relation to their process path. Not only on their first day, but for the following weeks. I make it a point to try and remember everyone's name and be as warm and welcoming as possible.
- Champion SAFETY above all and encourage everyone to do the same, helping identify and report hazards. Holding myself to a higher standard to be a good example for all employees.
- Collaborate with Process Assistants and Floor Managers on new hire audits to check their progress and suggest areas of improvement. Examine individual strengths and recommend tasks to managers where associates would feel accomplished and engaged.
- Identify and report employee misconduct to management after an attempt to coach proper practices. Use a “compliment sandwich”
- Prepare new hires for success in their new roles.

Journeyman Controls Electrician

LONG Building Technologies - Littleton, CO

January 2017 to February 2021

- Oversee and perform the detailed install of BAS and HVAC Controls Systems.
- Train multiple apprentices to work safely and efficiently, with an emphasis on best safety practices.
- Participate in the Mentor Program on multiple occasions. My greeting email to a new coworker was used as an outstanding example in the Company Program Outline.
- Coordinate project requirements and execution planning with other trades, and occasionally interact with and train customers on new equipment/devices. Supervising up to 5 projects simultaneously.
- Delegate tasks to others in order to help with efficiency and other labor planning.
- Adequately juggle multiple projects at once, maintaining deadlines and documenting any deviations from design and submit to customer for records.

- Perform incredibly tedious panel wiring and eventually devise and execute Panel Standards for training purposes. The new standard removed most of the guess work as far as sizing and layout, eliminating roughly 20% of questions that could cause for reworking wiring and layout.
- Troubleshooting of various electrical/mechanical systems, and creatively addressing safety issues before executing work.

Electrical Apprentice

LONG Building Technologies - Littleton, CO

February 2012 to December 2016

- Assist in the install of BAS and HVAC Control Systems
- Calculate, bend and install conduit (EMT, PVC and Rigid)
- Assess project deadlines and execute work in an orderly and timely fashion
- Learn to read Construction Blueprints and Project Schedules
