No, ill just her verbal warning. I have spoken to her but it wasn't documented and today I caught her about setting the apples on the plate. She has been sanitizing today. I was told from GMP monitor that she doesn't do it sometimes, but I will need to investigate it.

Thanks

Thuria has difficult time listening. I believe she has trouble hearing.

When the alarm goes off for workers to Sanitize sometimes she doesn't do it because she couldn't hear it. I have spoken with her, asking her to sanitize when she sees other people sanitize.

She also have been setting apples on the side plate and I have spoken with her about that a couple of weeks ago. She told me she understood it and I'm still hearing from GMP monitors that she is doing it still.

I will talk to her again and give her a verbal warning to make her understand and how serious the situation is.

Thanks
