Authorized to work in the US for any employer

Work Experience

General Laborer

Old Skool Komposites LLC. - Mocksville, NC

February 2022 to Present

Carefully trace and cut templates onto/out of carbon fiber rolls and then carefully cut the pieces with a razor knife. Afterwards, carefully placing the cut pieces of carbon fiber in a careful and specific order into a mold making relief cuts where needed and patching empty spots on the mold ensuring the weave still aligns, and trim around the edges bringing the precured part even with the mold shape. Then put a release film over the part - plastic sheeting that is more heat resistant than most plastics, making sure the release film is snug in all crevices, corners, and cut outs. I then flip the part and place a piece of cotton that will wrap around the part and allow for air flow from the part to the bag. Bags are made specific for each piece in length and it must be cut and checked and tacky tape added to the bag to make it a bag - it starts on a roll as a tube - Place the part in the bag put a vacuum tap on the bag then seal the other side. Then attach an air hose connected to a vacuum pump to the vacuum tap and remove the air and make sure the bag is sealed with no air leaks before placing it into the oven.

Mixing LAM RESIN Aluminum filled with hardener in specific amounts and laying fiber glass sheets over molds that are not yet ready and cross hatching each layer. ensuring no air bubbles, dry spots, thin spots, and patches where needed. Very tedious.

Door to Door Sales Representative

EmPower Solar - San Diego, CA

April 2022 to May 2022

Door to door sales gathering leads and setting appointments for inspections and solar panel installations. I did not work here long due to payment reasons.

Machine Operator/Forklift Operator

Hibco - Yadkinville, NC

April 2021 to October 2021

High production from my first day on the waterjet cutter. Was able to keep the machine running, maintain quality, ensure that material was no issue for the machine to be running.

Used forklift for getting new material, taking off trash, and stacking finished pallets in the warehouse. Fill out work report with good, bad, and defective parts.

Success measured by a target number of pallets average was between 8-12 depending on what job was being ran. I was normally able to exceed this goal by 2-3 pallets. When I was hired the company was 6 months behind and I was able to get it caught up in only 3 months.

Machine Operator/Assembler

Diversified Foam Inc - Yadkinville, NC

November 2020 to April 2021

Ran 3 machines.

The grinder included separating types of foam that could and could not pass through the machine. Keep the work place clean every night.

The press included running quality parts through the machine making sure that the machine cut, pressed, and shaped the parts right. Keeping a log of production. Prepare merchandise for shipment.

The punch included ensuring all parts are turned the right way with the proper cuts and edge work. Prepare the product for shipping. Cleaning the dirty product and ensuring customer satisfaction.

Quality of quantity as most of the foam was for packing fragile security systems, printers, medical equipment, and some other types of every day items. I was normally left in charge of my own tasks here and performed exceptionally well in all areas

Machine Operator

Hayward Industries - Clemmons, NC

June 2020 to November 2020

Trained on 2 machines. Check the quality parts as well as run them through a tester machine for the product purpose effectiveness. Carefully monitored machine during the running process, speed, positioning and feed rate. Maintain detailed production reports. Success was determined by successful parts meeting a quota set for the shift. I always met quota unless a breakdown prevented me from doing anything with the machine.

Sales Representative

Troc Wireless - Elkin, NC

August 2019 to October 2019

Approach customers in Walmart and use sales tactics such as relation, sympathy, friendliness, and ways that different phone carriers could benefit them better than their current carriers. Set up marketing tables and events to attract a buyer base. Customer satisfaction always first.

I was able to successfully make average 13 sales a week on five 8 hour shifts. The job was also incentive based so the more sales made the money I received. Primarily used honesty with customers to guarantee satisfactory.

Cook/Cashier

Pizza Hut - Clemmons, NC

January 2018 to July 2018

Prepare dough, clean the make table, make pizza to order properly, cleaning at the end of the day, as well as a couple End-of-Day reports and schedule making.

Education
