

TONY PEZZELLA

(303) 956-8520 tonypezzella@gmail.com

I am trying to find employment where there is opportunity for advancement and where it might be possible to start a career.

EXPERIENCE

OCTOBER 2016 - MAY 2018

PACKAGING MANAGER, MAHATMA CONCENTRATES

- Kept inventory of packaging supplies and ordered packaging supplies according to projected workload
- Managed a crew of up to 8 people
- Worked with clients, sales people, and extraction team to ensure products were delivered on time.
- Ensured that all work was being done in accordance with state laws and CDPHE health codes.

FEBRUARY 2014 - SEPTEMBER 2016

PRODUCTION MANAGER, EDIPURE

- Coordinated with sales team to determine production numbers each day to ensure products were ready for orders.
- Kept inventory of raw candy, blank and labeled bottles, and all other packaging materials.
- Organized warehouse and ensured that products were being used according to a fifo system
- Oversaw a crew of up to 16 people, included handling hr issues, hiring and firing, employee reviews, and making sure that attendance and non discrimination policies were enforced.
- Ensured that all health code rules were being followed at all times
- Ensured that all products were packaged and labeled in a compliant manner.
- Printed labels on an Afinia printer and labeled bottles using a labeling machine
- Used forklift to manage warehouse
- Occasionally helped in the lab, used Büchner funnels for filtering and a rotovap to concentrate oil

AUGUST 2010 - FEBRUARY 2014

TECH/LAB TECH, HAZEN RESEARCH

- Prepared samples according to prep sheet provided by project engineers. Included using machinery to crush core samples or other materials to acceptable sizing for various tests, and ensuring that the

samples taken were homogeneous and representative of the entirety of materials received

- Tested materials for many attributes including hardness, friability, density, btu energy, and mineral content.
- Tested new and experimental processes using controls to compare to existing methods.
- Safety was always a priority as many of the experiments being performed involved potential hazards from flammable materials, radioactive materials, pressurized vessels, potential adverse chemical reactions, and machinery.
- Had to use proper ppe at all times which could include anything from safety glasses and hard toe boots to full chem suits and full face respirators
- Received OSHA safety training, hazardous waste operations safety training, and forklift training

January 2008 April 2010

Shift Lead, Blockbuster Video

- Assisted customers with finding products
- Explained rental policies to customers
- Sold various customer loyalty programs
- Pushed any up sales promotions were going on at the time, usually on candy, soda, and used movies
- Handled customer complaints and disputes including arguments over late fees and missing or unreturned movies
- Oversaw two to three employees per shift
- Performed opening and closing duties including counting money, preparing tills, and preparing the bank deposit
