I'm looking to use my skills to be a part of a new company. I feel that I'm an easy fit and I learn things very quick.

Authorized to work in the US for any employer

Work Experience

Machinist/ Operations Specialist

Garlock Pipeline Technologies - Wheat Ridge, CO

August 2015 to Present

- Operate CNC choosing programs and doing my own set ups between jobs.
- Operate manual lathes.
- Work in our Seal Install Cell, installing all seals into our gaskets utilizing all knowledge of different adhesives and seal materials.
- Operate the Laser Engraver, engraving gaskets with gasket sizes, pressure class, order numbers.
- Operate and trouble shoot the Linebacker Gasket Automation Line. Transacting all complete orders as well as QC all finished orders.
- Minimal work within the Coating Cell.
- Work in the Kitting Cell, packing orders and labeling them so they could ship.
- Also learned to read G code on the CNC. With this also learned to write programs for our inhouse products, roughly 2 months of training on this.
- Lead our Fire and Safety Team, doing safety audits, audits on all fire extinguishers and fire exits, execute fire drills to ensure we are up to standard on our evacuation plans.
- Assist in training new hires on our safety culture as well as training on all equipment in the Machining Cell.
