

Wayne Carter Jr.

112 Barrett Rd. Willow Grove Pa. 19090 (267) 575 7081 jrwc7616@gmail.com

Experience

2023-PRESANT

Self employed

8/2020-11/2023

PDC Machines

I started out building machines and systems from the ground up to completion. I would acquire the parts necessary to build the project. I would build and test subassemblies. I then would assemble mechanically and electrically. After assembly I would hook the machine up to the test loop for testing. After testing unhook the machine and get it ready for shipping. I was one of 40 people laid off at once due to downsizing.

11/2014-8/2020

Milton Roy

I started on one of the assembly lines building and testing pumps. I moved to another area building and testing pumps. I then started doing multiple jobs including pulling parts for customer orders, material handler, building subassemblies, quality control of parts before consolidation and sending to shipping.

Education

UPPER MORELAND HIGH SCHOOL-GRADUATED 1983

PENNCO TECH- Graduated 1984 with an associates degree in automotive, gas and diesel

Skills

I have done tubing and piping on machines and systems. I have done wiring of machines and systems. I have used a lot of Swagelok fittings and tubing. I have used pipe threading machines to make and fit cooling systems to machines, test loops and systems. I was an auto technician for many years. I have a gutter business that I have done full time and part time.
