

Will Schneider

CNC Milling Machinist

Denver, CO

will.nala@yahoo.com

6313553254

Hello, I am William C. Schneider and I am currently twenty-one years of age, I recently relocated from New York to Denver in search of better atmosphere and opportunities. I do not possess a high school diploma or GED equivalent due to an unfortunate mishap in my senior year of high school. Be that as it may, I do have hands-on experience with setting up operations in milling machines and tooling. As well as other applicable skills involving a machine environment such as annealing stock or utilizing other machines such as bandsaws for cutting material for example. The materials I am most familiar with are Brass, Bronze, Stainless Steel and Delrin. Familiar with FANUC interfaces, have operated Robodrill, Daewoo and Doosan milling machines. I have also filled in for the Quality Control manager multiple times for my previous company as I am very thorough. My knowledge is limited but only continues to expand. Minor programming experience within Gibbscam but eager to learn more. Thank you for your consideration.

Work Experience

CNC Machinist

THE NANZ COMPANY - Deer Park, NY

February 2018 to July 2021

After undergoing extensive training I was introduced to the milling department and became an integral part of Nanz's machine-work environment.
