Most recently, I processed stainless steel and titanium medical screws through CNC mills and lathes. I performed visual and dimensional inspections on the parts following the AQL sample size specified. I documented work performed and inspected documentation for accuracy. I tracked and investigated orders in JD Edwards. I also processed parts through cam driven lathes, acid and vapor parts washers, media bead blasters, vibe drums and bowls, visual inspection machines, and bag and label operations. I was on new machine validation teams to help validate new CNC mill machines coming on line. I was on a deep dive team to address and reduce machine downtime for current CNC mill and lathe machines. I trained new and contract employees on all operations.

Previously I have worked in and trained employees in a shipping department. I trained and licensed employees on industrial forklift trucks (forklifts, straddle reachers, order pickers, and turret trucks). I created bills of lading for various carriers. I operated a yard dog tractor to jockey truck trailers around the property. I audited orders for accuracy and tracked down inventory in Oracle and physically. I was on the safety committee.
