Oversee coordination, production and fabrication of all jobs through shop, including but not limited to:

- All aluminum welding and fabrication
- All held tolerances and finishing, such as grinding, polishing and shaping of parts
- Creation of schedule for incoming and shipped jobs
- Implementation of 5S procedures

Responsible for completing custom framing fabrication, from cutting parts to Welding, grinding and shaping, on both mild steel and aluminum.

Tig welding of aluminum block, cast aluminum, and steel tubing.

Responsible for interviewing, hiring, and training new employees in shop and industry processes.

Operation of all welding equipment, plasma cutters, oxy-acetylene torches, saws, grinding equipment and hand/power tools.

Operation of forklift. Certified forklift license from previous employer.

Operation and training of sandblast and shot peen booths and processes.

### **Aluminum TIG/MIG fabricator**

Distinctive Iron - Elk River, MN

May 2017 to January 2018

- Cut, fit, weld and finish all aluminum components according to given blueprints.
- Set-up and operation and maintenance of Miller welding equipment.
- operation of hand tools, automatic saws and drill press in accordance with blueprint requirements.

### **Lead Welder/ shop lead**

Americlad Quality Metalcrafts - Rogers, MN

May 2015 to May 2017

Responsibilities

Coordination of products to ensure timely delivery to customer. Oversee, train and operate welding, grinding/finishing and assembly departments to ensure correct execution of fabricated parts according to blueprints and timely delivery to shipping to ensure prompt delivery to customer.

Custom metal fabrication using TIG and MIG welding processes on aluminum and steel. Blueprint reading used daily and Miller welding machine maintenance as necessary.

-Welding experience-  
2013- present

#### Accomplishments

I have repeatedly received praise from my lead foreman for going above and beyond in my work, coming in early and staying late on a daily basis and problem solving abilities in the welding field.

#### Skills Used

Skills used include:

TIG welding  
MIG welding  
Plasma cutting  
Drill press  
Blueprint reading  
Metal finishing using grinders  
Knowledge and use of sho hand and power tools

### **TIG Welder/Fabricator**

Staging concepts - Brooklyn Park, MN  
August 2015 to March 2016

#### Responsibilities

Fabricate, TIG and MIG weld aluminum railing systems. Duties include but are not limited to:

- TIG/MIG welding
- Metal finishing
- Welder setup
- Blueprint reading

#### Skills Used

- Precision TIG/MIG welding
- Blueprint reading
- Metal finishing
- Use of hand tools, power tools, and shear experience

### **Welder**

Premier pontoon - Wyoming, MN  
May 2014 to May 2015

#### Responsibilities

Currently I am a MIG and TIG welder. I weld boats at premier marine including, but not limited to, tube welding and robotic welding. I also have much experience in using hand and power tools. Some of my other job duties include grinding down my welds, detail checking the components that I weld for pinholes and other scratches, dents and any other abnormality within the finished product. The

welding I do consists of TIG and MIG welding around circular piping, vertical welding, horizontal welding and downhill welding on aluminum from .090 and up in thickness.

#### Accomplishments

In my few short months at Premier Marine, I have received three raises due to excelling at work. I have also been appointed as a person to train new welders to work in other areas I have previously worked in.

#### Skills Used

Skills demonstrated at this job include:

- MIG and TIG welding
- Extensive use of power and hand tools
- Extensive detail checks of each product before it is moved to different areas of the production line
- Speed and precision in a fast paced environment

### **Warehouse Worker/Forklift Operator**

Target Distribution - Fridley, MN

June 2013 to September 2014

#### Responsibilities

My daily responsibilities included stocking of product into semi-truck trailers, operation of forklift to move PIPO (palleted product) into trailers and around building, operation of motorized pallet jack to move product to different areas of the building.

#### Accomplishments

I was openly recognized by my supervisor as a fast and detailed worker, obtaining satisfactory numbers thought the shift. ( target is based on a percentage system, after each break you want to average 100%, I consistently averaged between 105-125% through the night).

#### Skills Used

Skills demonstrated include:

- forklift operation
- speed and precision in a fast paced environment
- detail in stocking of trailers

## Education

---
