### **SUMMARY**

Production oriented manufacturing / warehouse / machinist with ability to work in a fast-paced stressful environment. Experienced working in a team environment or with minimal supervision. Operation of high speed production machinery. Skilled and trained on many types of technical machinery. Mechanical set-up abilities. Astute in uploading and adjusting programs for computerized machine equipment. Proficient reading Engineering drawings and custom blueprints. Trained in 5 S and Lean Manufacturing. Excellent safety record for entire work history.

### **EMPLOYMENT HISTORY**

MillerCoors (Aerotek)

06/10-present

#### **RT Loader / Warehouse Operator**

- Load trailers and railcars with beer products for shipment; insure proper load
- Forklift operator certified (single, double, pull-pak, keg); certified to use multi-shifter for the change-out of batteries
- Operate shrink wrapper and pallet inverter machinery
- 2 pallet pickup trained using Cascade forks on Hyster forklifts
- Load trailers and railcars with beer products for shipment; insure proper load
- Enter data into WITS computerized system
- Work in a team environment pulling beer from the production lines
- Quality inspection of beer products and packaging before shipment
- Rail Dock Shipper duties include:
  - Verify accuracy of information and ensure proper load on shipping paperwork
  - Enter data into WITS to ship
  - Inspect railcars for damage; insure safety of shipment by inserting dunnage and airbags after load is completed

Eaton Corporation, Hydraulics Cylinder Division, Jackson, MI 2002-2009

#### **Machinist / CNC Operator**

Manufactured hydraulic cylinder components utilizing cut-off machines, CNC lathes, mills, grinders, gun drill, turret lathes, die-cut and roll threaders. Materials used in machining process were steel, case hardened steel and stainless steel stock ranging from 3/16" to 5" diameter. Performed duties as safety representative and volunteer Red Cross certified in CPR. Experience using all technical measuring tools: calipers, micrometers, gauges, micro-finisher, hand tools to ensure tolerances are met. Implemented 5 S techniques and practices. Plant achieved QS9000 status.

Jonesville Tool Manufacturing, Jonesville, MI

2000-2002

#### **Machinist**

Operated automatic spindle feed CNC machines producing automotive hubs out of cast iron stock. Drilled and tapped holes and micro-finished hubs. Lubricated and packaged finished product for shipment to customer.

Hillsdale Tool Manufacturing, Jonesville, MI

1999-2000

#### **Machinist**

Manufactured dampers for Ford and Toyota utilizing broach, drill and tap, hydraulic and injection mold presses, roll stamp and shot blast. Manufactured hubs and rings on CNC lathes utilizing aluminum and cast iron stock.

### **EDUCATION**

Completed Master Task Training Systems, CNC lathe, on-line course 2007  
Giessen American High School, GED, 1998
