Job Objective: I am seeking to pursue a career in the electrical/ technical field. I am seeking a position with a company that offers stability, and long term growth. I am deeply passionate about the process of continuous development; with regards to my own skill set and with regards to the company at which I am employed. I am seeking a company that empowers employees to collaborate and create innovative solutions to the challenges at hand.

Qualifications:

Proficient in electrical installations, troubleshooting, and repairs.

Experience with control circuits and motor control equipment.

Experience with Connected Components and Allen Bradley VFDs.

Previous work experience in a metal fabrication factory.

NCCER certified and OSHA 10 certified.

Experience with PLC programming RS Logix 5, RS Logix 500, and RS Logix 5000.

Able to read electrical, mechanical, and logic schematics.
