Work Experience

Painter

Unique Techniques - Arvada, CO

June 2020 to Present

Through this company I have gathered a lot of communication skills with customers in residential and commercial background, as my company does both small to large houses. And also takes on big commercial projects like schools, red rocks, and places like the federal reserve that requires big project managers. I've been able to work along side a small crew that is able to tackle these jobs with little to no leadership role and or instruction giving me a chance to take on jobs myself and complete my work in a timely manner.

Mechanic

AUTO TRUCK - Colorado Springs, CO

December 2019 to June 2020

I currently work as a mechanic. Here I am required to upfit trucks for municipal, railroad, and personal use. The skills I've gathered here are; welding, soldering, fabrication, and reading schematics and blue prints. I now have an understanding of equipment such as hydraulic press, laith, drill press, and plasma cutting.

Apprentice Electrician

Matthew brothers - Pueblo, CO

June 2019 to December 2019

As an electrician apprentice I followed residential and commercial projects. My main duties included installing light fixtures, running wires, installing breaker panels, and assisting in any other way my license allowed me. In this trade I learned a diverse skill set I could use in many other fields.

Head Mechanic

Green Mountain Pharmaceuticals

October 2017 to March 2019

Service and maintain proper functioning machinery; rebuilding of machinery and servicing electrical functions. Production of high volumes of over the counter medications. Maintaining FDA regulation production standard; proper PPE requirements, cleaning of machines to FDA standards, and HAZMAT certified. Inspection of quality of medications.

Mechanic

Mark 7 - Arvada, CO

September 2016 to October 2017

Construction of car wash machinery; building of motors, wiring of motors and electrical signs. General overflow work; construction of pressure wash

sidearms, construction of garage doors, and light installation on doors.

Quality check that all production pieces work together. Forklift certified through Neil Tannish under Mark7.
