Experience

Water World

May 2017- September 2017

At this short summer job the grounds crew I was apart of kept the water park clean. I worked almost everyday so I used my time management to get to work on time and make myself work even if I was having a bad day to get the job done.

Peaceful Valley Scout Ranch/ Denver Area Council

May 2019-July 2019

I was the Camp Cris Dobbins Trading Post Lead. My job was to make sure the trading post ran smoothly and help the customers anyway I can. I relieved the clerks when needed. I cleaned in between waves of customers along with restocking. I was able to collaborate with my staff to keep the trading post running smoothly. I kept my business honest with the customers and never lied to them to make a buck. However since this was my first full time job with a management position I saw that I was under qualified for the job. I told them I will come back for this position once I have more experience, but until then I will come back and work as a counselor or at another area as a manager position. I used my personal self evaluation skills and honesty to make this choice.

Sam's Club Cafe

October 2019 - December 2019

During this position I was working at the cafe in Sam's Club off of Grant St. While I was in this position I was working with food prep and sale. I served customers daily and ran the registers. I used my previous experience from the summer job with the Boy Scouts of America from running the Trading Post. I am used to working with funds and people to make sure that what was needed and expectations were met.

Adams 12 5star school district

June 2020 - Present

The position I was hired for is Event Assistant. This position required me to work at all the stadium locations within the district. The duties that were required were the ticket taking and asking attendees for money to allow entry. Also required to usher attendees to their seats, and make sure they followed COVID-19 guidelines properly. Occasionally help set up events upon request.

Geotech Environmental Equipment

April 2021 - July 2023

The position I was hired for is Extrusion machine operator. My position required the ability to manufacture and maintain product production per line. Use training to make adjustments to keep parts within specifications. Use problem solving skills to improve previous production runs. Use knowledge of plastics to understand how parts and machinery can be improved upon.
