What is Budesonide Inhalation?

Budesonide is a corticosteroid that prevents the release of substances in the body that cause inflammation.

Budesonide Inhalation is used to prevent asthma attacks in adults and children who are at least 6 years old.

Budesonide Inhalation may also be used for purposes not listed in this medication guide.

Important information

Do not use Budesonide Inhalation to treat an asthma attack that has already begun. Budesonide Inhalation is not a rescue medicine. It will not work fast enough to treat an asthma attack. Use only a fast-acting
