Azelaic acid 20% cream

What is this medicine?

AZELAIC ACID is used on the skin to treat mild to moderate acne.

What should my health care professional know before I take this medicine?

They need to know if you have any of these conditions:

- herpes or cold sores
- an unusual or allergic reaction to propylene glycol, azelaic acid, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

This medicine is for external use only. Do not take by mouth. Wash your hands before and after applying. Make sure the skin is clean and dry. Apply just enough cream to cover the affected area. Rub in gently but completely. Keep the cream away from the eyes, mouth, and other areas of sensitive skin. If accidental contact occurs, large amounts of water should be used to rinse the affected area. If eye irritation persists after thoroughly washing, contact your doctor or health care professional. Do not place a bandage, wrap, or dressing on top of skin where this medicine has been applied. If you are using other topical medicines, apply them at different times of the day.

Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.
