Glipizide tablet

What is this medicine?

GLIPIZIDE helps to treat type 2 diabetes. Treatment is combined with diet and exercise. The medicine helps your body to use insulin better.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- diabetic ketoacidosis
- heart disease
- kidney disease
- liver disease
- porphyria
- severe infection or injury
- thyroid disease
- an unusual or allergic reaction to glipizide, sulfa drugs, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

Take this medicine by mouth. Swallow with a drink of water. Do not take with food. Take it 30 minutes before a meal. If you take this medicine once a day, take it 30 minutes before breakfast. Take your doses at the same time each day. Do not take more often than directed.

Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.
