Tadalafil Chewable tablet

What is this medicine?

TADALAFIL chewable tablets are used to treat erection problems in men. The soft tablets act faster than ordinary oral tabs and the effect is kept as long as from regular pill.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- eye or vision problems, including a rare inherited eye disease called retinitis pigmentosa
- heart disease, angina, a history of heart attack, irregular heart beats, or other heart problems
- high or low blood pressure
- kidney or liver disease
- stroke
- an unusual or allergic reaction to tadalafil, other medicines, foods, dyes, or preservatives
